-----  
Welcome to houseSYSTEM.  
-----

Introducing the web site that will change student life at Harvard: houseSYSTEM. And you already have an account.

Plan your shopping period. See who owns the textbooks you want. Sell your fridge. Browse the message board; forget house-open spam. Check your e-mail. Search Google. Query the HSA Unofficial Guide for a Thai restaurant you haven't already been to. Or seven. See if you have packages. Get a job. Hitch a ride to Barcelona. Reserve rooms. Find out which houses have bright blue doors. Give the administrators those evasive pre-registration statistics that they just can't seem to come up with.

Now it's all in one place, it's all student-run--and it's all without sacrificing your shopping period.

The Harvard Student Entrepreneurship Council presents houseSYSTEM.

Visit <http://www.harvardsec.org/projects/housesystem.html>, and see for yourself.

Aaron,

The Dean's office, and the office of computing services for FAS, have asked that I contact you and ask you to immediately stop collecting student email and password information on your HarvardSEC website for security reasons. Any email addresses, passwords, or student information you currently have should not be used or transmitted in any form until this matter is cleared up. Paul Bottino, FAS computing services, and the dean's office, will look into the matter next week (Paul is currently on vacation and has undependable email access only. He will return on Monday).

If you have any questions, please feel free to be in touch with me.

Jay

## Thursday, August 28, 2003

### 3:31:17 PM EDT

Jay Ellison addresses Aaron Greenspan's "proposed face book" in an e-mail to the officers of the Harvard College SEC, interchangeably using the term "face book" and "facebook" (with and without a space).

Dear SEC,

I appreciate your addressing some of the issues I raised in my last letter regarding the SEC and houseSYSTEM web sites. There are some remaining issues to resolve, a number of which were discussed in an email that Aaron sent to me at the end of last week. I have summarized these issues briefly below.

1. Most importantly, at this point, SEC is not an approved undergraduate student group, despite its connection to the former TECH student group. Therefore, the SEC must go through the normal steps for approval and authorization from the College. This procedure is not difficult, as you know, and Dean Judith Kidd has advised me that she will expedite the approval process for SEC. However, there are certain items SEC must provide for Dean Kidd to move forward; I believe her office, through Susan Cooke, has already been in touch with you about this.

2. Once SEC is approved by the College, it will have permission to use the Harvard name, but the Provost's office (which oversees use of name issues) has advised that you must use "Harvard College" rather than simply "Harvard," meaning that the name of the group will become "Harvard College SEC." Please also be aware that the Provost's office is now reviewing the use of Harvard's name in domain names, a practise that is not allowed. It is quite possible that, as a result of this review, all student groups with domain names that include "Harvard" will be required to change their URLs. Although this is not now a requirement for you, it may be worth your preemptively changing the domain name, removing the name Harvard from it and any related pages. That way you can take care of this before your list of subscribers gets much bigger.

Most importantly, you must make clear that your group is a student group and is not operated by Harvard University. For houseSYSTEM, Aaron's proposed disclaimer "houseSYSTEM is not endorsed by or operated by Harvard University" is sufficient. This disclaimer must appear on every page of the site. Additionally, to ensure that there is no confusion, you should continue to use your own shield on your sites. The design is clear and quite good, and helps to distinguish the sites from official University sites.

3. As I mentioned in my previous email, simply because a work is available on the web does not make it available to be copied, even with proper attribution. Copyrighted content can only be reproduced with the permission of the copyright holders. The University owns the copyright to all content on the House web sites but once SEC is officially approved by the College you may approach the Masters of each House directly and ask for permission to use content from their sites. Without express permission of the House Masters, nothing on Harvard's House websites can be duplicated. Once permission is granted, you will still need to provide attribution, followed by a note stating: "Used with permission."

(As an aside, your use of the Spider Man theme on the houseSYSTEM site may also be a copyright violation. Since Hollywood and the music industry are cracking down heavily on infringements of copyright, you may want to reconsider your use of that material.)

4. As for the proposed face book, the College will not permit the SEC to post on your site information that it collects or maintains about students. Federal law imposes strict obligations on the College with regard to the dissemination of student information, including names, addresses, phone numbers and photographs. The College therefore will not release information of this kind to you, or to any other student group for that matter, even with students' consent. I should also remind you that it is a violation of

College rules to gather such data from a Harvard source and recompile it in any form. You cannot, therefore, simply take information from house facebook and post it on your site. If you have specific questions about this issue, please feel free to contact me.

To sum up, once SEC has received official approval from the College and you have addressed the above issues, you will be able to reopen the site to new members. As I stated, Dean Kidd has promised to fast-track the approval process, so it is in your interest to get the required information to her as soon as possible. If you have any questions, please feel free to contact me. Again, I would like to have the opportunity to meet with all of you when you return to the Cambridge area.

## Friday, August 29, 2003

### 4:00 PM EDT

Aaron Greenspan and Jay Ellison meet in Jay Ellison's office in Lowell House A-entryway, where Aaron presents Jay with evidence of the Harvard University administration trespassing on Think Computer Corporation's privately owned server without permission. The houseSYSTEM Face Book is one of many topics of conversation.

Subject: New! The houseSYSTEM Universal Facebook!  
Content-Type: text/plain; charset=ISO-8859-1; format=flowed  
Content-Transfer-Encoding: 7bit

Have you ever wanted to find someone in another house? How about a freshman? Ever been frustrated by house web site restrictions? Do these kinds of questions at all remind you at all of cheesy infomercials?

If you answered yes to any of these questions, then keep on reading.

The Harvard College SEC presents the newest feature on houseSYSTEM: the Face Book.

Now you can find exactly who you're looking for, as long as they're a houseSYSTEM member and they've opted-in. And with one out of every eight Harvard College students signed up, and many new members each day, there's a good chance they have.

Start using the houseSYSTEM Face Book today! Visit your house's houseSYSTEM site, or to become a member, visit:

<http://www.harvardsec.org/projects/housesystem.html>

Don't forget you can also buy and sell textbooks and other items, review courses, and trade DVDs all on houseSYSTEM--and it's completely free. Keep an eye open for the next feature: the houseSYSTEM Jobs center.

I'd definitely be interested in checking out SEC. When and where do you guys meet? I'll try to make the next meeting...

Mark

## Sunday, January 4, 2004

5:35:05 PM EST

Mark Zuckerberg visits the Harvard College SEC web site and clicks on the link to the Kirkland House houseSYSTEM home page.

roam175-29.student.harvard.edu - - [04/Jan/2004:17:35:05 -0500] "GET / HTTP/1.1" 200 14784 "http://www.harvardsec.org/projects/housesystem2.html"  
"Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

5:35:22 PM EST

Mark Zuckerberg signs into houseSYSTEM with an account other than his own, as he technically hasn't signed up as a member yet. He proceeds to use the CriticalMass course shopping list for approximately two minutes.

roam175-29.student.harvard.edu - - [04/Jan/2004:17:35:22 -0500] "POST /index.html HTTP/1.1" 200 18590 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 5:38:37 PM EST

Still using an account other than his own, Mark Zuckerberg signs into houseSYSTEM's Universal Face Book.

roam175-29.student.harvard.edu - - [04/Jan/2004:17:38:37 -0500] "GET /facebook/index.html HTTP/1.1" 200 40723 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

## Monday, January 5, 2004

### 4:44:46 PM EST

The next day, Mark Zuckerberg goes back to the My Account page on houseSYSTEM by clicking on the link from the Universal Face Book window that was still open on his computer from browsing the previous day.

roam175-29.student.harvard.edu - - [05/Jan/2004:16:44:46 -0500] "GET /myaccount/index.html HTTP/1.1" 200 5464 "http://www.kirkland.harvardsec.org/facebook/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 4:44:50 PM EST

Four seconds later, Mark Zuckerberg visits the Credits page of the site, which clearly stated that Aaron Greenspan and Think Computer Corporation were the authors and owners of the copyrighted software contained therein.

roam175-29.student.harvard.edu - - [05/Jan/2004:16:44:50 -0500] "GET /credits/index.html HTTP/1.1" 200 8249 "http://www.kirkland.harvardsec.org/myaccount/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 5:01:47 PM EST

Mark Zuckerberg visits the My Account page, possibly opening a new tab in his web browser.

roam175-29.student.harvard.edu - - [05/Jan/2004:17:01:47 -0500] "GET /myaccount/index.html HTTP/1.1" 200 5464 "http://www.kirkland.harvardsec.org/facebook/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 5:01:48 PM EST

After using the My Account page, Mark Zuckerberg visits the Credits page once more.

roam175-29.student.harvard.edu - - [05/Jan/2004:17:01:48 -0500] "GET /credits/index.html HTTP/1.1" 200 8249 "http://www.kirkland.harvardsec.org/myaccount/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

## Tuesday, January 6, 2004

### 12:03:07 AM EST

Mark Zuckerberg clicks on the link to the Universal Face Book on the houseSYSTEM home page for Kirkland House.

roam175-29.student.harvard.edu - - [06/Jan/2004:00:03:07 -0500] "GET /facebook/index.html HTTP/1.1" 200 5470 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 12:03:11 AM EST

After taking approximately five seconds to display an error message, Think's Lampshade<sup>®</sup> programming framework automatically rejects Mark Zuckerberg's request to visit the Universal Face Book since his previous session has expired. He is redirected to the home page for the Kirkland House houseSYSTEM site.

roam175-29.student.harvard.edu - - [06/Jan/2004:00:03:11 -0500] "GET /index.html?url=http://www.kirkland.harvardsec.org/facebook/index.html HTTP/1.1" 200 14880 "http://www.kirkland.harvardsec.org/facebook/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 12:48:36 AM EST

About forty-five minutes later, Mark Zuckerberg either manually types the Kirkland House houseSYSTEM site's web address into his web browser's URL bar, or clicks on a bookmark he has created for the site.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:00:48:36 -0500] "GET / HTTP/1.1" 200 14784 "-" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:19:11 AM EST

Mark Zuckerberg sends an e-mail to Aaron Greenspan.

```

Aaron,

I was thinking of making a web app that would use the Harvard course catalog, but I'm a little worried about the university getting upset after the whole facemash episode. I know you used info from the catalog in your shopping list scheduler in housesystem (which is awesome by the way), so I was wondering if you had to get permission to use that material and if so, whom you contacted. Or maybe if you didn't ask permission but you think I should for extra precaution, do you have any idea whom I could ask?  
Thanks a lot!

Mark

### 6:20:09 AM EST

At about six in the morning, Mark Zuckerberg searches for "universal facebook" on Google, finding the Universal Face Book on the Quincy House houseSYSTEM web site.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:20:09 -0500] "GET /facebook/ HTTP/1.1" 200 5436 "http://www.google.com/search?hl=en&ie=UTF-8&oe=UTF-8&q=universal+facebook&btnG=Google+Search" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:20:40 AM EST

Coming from the Universal Face Book page, Mark Zuckerberg attempts to sign into the Quincy House houseSYSTEM site, but does not have an account yet.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:20:40 -0500] "POST /index.html HTTP/1.1" 200 5813
"http://www.quincy.harvardsec.org/index.html?url=http://www.quincy.harvardsec.org/facebook/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:20:48 AM EST

Mark Zuckerberg comes back to the Kirkland House houseSYSTEM site from visiting the Quincy House houseSYSTEM site, where he again lands up on the Credits page.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:20:48 -0500] "GET / HTTP/1.1" 200 14779 "http://www.quincy.harvardsec.org/credits/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:21:00 AM EST

Mark Zuckerberg attempts to sign into the Kirkland House houseSYSTEM site, but does not have an account yet.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:21:00 -0500] "POST /index.html HTTP/1.1" 200 5821 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:21:10 AM EST

Ten seconds later, Mark Zuckerberg visits the Sign Up page on the Kirkland House houseSYSTEM site.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:21:10 -0500] "GET /signup/index.html HTTP/1.1" 200 13567 "http://www.kirkland.harvardsec.org/"  
"Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:21:38 AM EST

Mark Zuckerberg clicks the Sign Up button at the bottom of the Sign Up page, but has not filled out the form correctly. An error message appears instructing him to correct the problems with his submission.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:21:38 -0500] "POST /signup/index.html HTTP/1.1" 200 14343 "  
http://www.kirkland.harvardsec.org/signup/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007
```

### 6:22:14 AM EST

Mark Zuckerberg clicks the Sign Up button at the bottom of the Sign Up page once more. The form is filled out properly, and row 1234 is added to the houseSYSTEM "members" database table, timestamped at 1/6/2004 6:22:14 AM. It is the only member row with this timestamp.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:22:14 -0500] "POST /signup/index.html HTTP/1.1" 200 6502  
"http://www.kirkland.harvardsec.org/signup/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:22:27 AM EST

Thirteen seconds later, Mark Zuckerberg signs into houseSYSTEM with his own account for the first time.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:22:27 -0500] "POST /index.html HTTP/1.1" 200 18449 "http://www.kirkland.harvardsec.org/index.html"  
"Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:23:24 AM EST

While using the CriticalMass course review component of houseSYSTEM, Mark Zuckerberg checks the profile for "COMPSCI 121: Introduction to Formal Systems and Computation."

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:23:24 -0500] "GET /criticalmass/courses/courseprofile.html?id=515 HTTP/1.1" 200 10062  
"http://www.kirkland.harvardsec.org/criticalmass/courses/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:23:45 AM EST

Less than two minutes after signing up, Mark Zuckerberg returns to the houseSYSTEM Universal Face Book on the Kirkland House web site.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:23:45 -0500] "GET /facebook/index.html HTTP/1.1" 200 40723  
"http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:23:51 AM EST

Mark Zuckerberg visits the "Face Book Profile" tab of the My Account page, which lists various fields and privacy settings that users can update on their Face Book profiles.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:23:51 -0500] "GET /myaccount/index.html?panel=facebook HTTP/1.1" 200 11069  
"http://www.kirkland.harvardsec.org/facebook/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:24:19 AM EST

Mark Zuckerberg visits the "Contact Information" tab of the My Account page, which lists various fields that users can update on their Face Book profiles.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:24:19 -0500] "GET /myaccount/index.html?panel=contact HTTP/1.1" 200 13655  
"http://www.kirkland.harvardsec.org/myaccount/index.html?panel=facebook" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:24:26 AM EST

Seven seconds later, Mark Zuckerberg visits the "Personal Information" tab of the My Account page, which lists various fields that users can update on their Face Book profiles.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:24:26 -0500] "GET /myaccount/index.html?panel=personal HTTP/1.1" 200 13907  
"http://www.kirkland.harvardsec.org/myaccount/index.html?panel=contact" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:24:35 AM EST

Mark Zuckerberg clicks the Save button at the bottom of the "Personal Information" tab of the My Account page, updating his profile.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:24:35 -0500] "POST /myaccount/index.html HTTP/1.1" 200 13946
"http://www.kirkland.harvardsec.org/myaccount/index.html?panel=personal" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:24:40 AM EST

Mark Zuckerberg goes back to the "Face Book Information" tab of the My Account page.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:24:40 -0500] "GET /myaccount/index.html?panel=facebook HTTP/1.1" 200 11069
"http://www.kirkland.harvardsec.org/myaccount/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:25:28 AM EST

Mark Zuckerberg goes back to the Universal Face Book.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:25:28 -0500] "GET /facebook/index.html HTTP/1.1" 200 40723
"http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 6:27:17 AM EST

Mark Zuckerberg searches the houseSYSTEM Universal Face Book for residents of a particular Harvard University residence.

```
roam175-29.student.harvard.edu - - [06/Jan/2004:06:27:17 -0500] "POST /facebook/index.html HTTP/1.1" 200 12172
"http://www.kirkland.harvardsec.org/facebook/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

### 10:33:51 AM EST

Aaron,

I actually did think about integrating it into houseSYSTEM before you even suggested it, but I decided that it's probably best to keep them separated at least for now. I really like the houseSYSTEM app, but this app requires a lot of user participation, and I'm worried that a) many of the people who have registered for houseSYSTEM in the past don't really go to the site anymore, and b) the vast number of features offered by houseSYSTEM might intimidate someone just looking for my app. That said, once it's off the ground, I think it could be mutually beneficial to integrate the two, but we can speak about that then.

For now I'm trying to keep the project on the dl, so I'd rather not discuss the details, but we can definitely speak about it once I am ready to release it.

Yea so I don't know if you'd be willing to help me out by telling me what processes you've gone through in the past to avoid getting ad boarded and such, but if you can tell me anything I would appreciate it greatly.  
Thanks!

Mark

Mark,

I had to enlist the assistance of three lawyers in order to avoid Harvard following through on its repeated threats of "disciplinary action," but those threats didn't relate to the course list at all. It seemed as if they could have cared less about that. I just imported the list from the registrar's site and put it into a table after some crazy string parsing. I'm sure you'd have no trouble doing the same, but you'll quickly find that Harvard's Oracle backend for courses is really a piece of crap. It takes some effort to work around it and turn the data into something sensible.

I'll look out for your project. Be careful, though...

Aaron

Aaron,

Thanks for the info. That's really intense that you had to get lawyers to fend them off. What exactly were they claiming you were doing wrong? And was this in connection to houseSYSTEM or just some personal work you were doing?

I actually already have all that stuff parsed, and if you ever need it just let me know. I know you have a version of it since you're using it for houseSYSTEM, but if you need one with course descriptions and prereqs I can give that to you if you're interested and don't already have those fields.

Best,  
Mark

Mark,

Very interesting. That might actually be useful. You know we could definitely use someone like you to keep houseSYSTEM going, especially since I'll be graduating soon... You sure you don't want to work on it? Seems like you're doing similar work anyway... :)

For me, accusations included, but were not limited to, trademark infringement, copyright infringement, violation of network policies, violation of security policies, and possible future security breaches. Maybe we should meet for dinner sometime or something and I can tell you the whole story, or what I can remember of it. I'd be interested to hear yours, as well.

Aaron

## 1:36:16 PM EST

Mark Zuckerberg goes back to the houseSYSTEM home page for Kirkland House after browsing various parts of the site earlier in the day.

roam175-29.student.harvard.edu - - [06/Jan/2004:13:36:16 -0500] "GET /index.html HTTP/1.1" 200 14786

Aaron,

I've definitely considered joining SEC and I still want to come to a meeting sometime when I get a chance. The general problem I have with these things is I don't usually have a long attention span for lots of coding. I like coming up with ideas and implementing them quickly, which is why I've stuck to mostly web development recently. So rather than join the houseSYSTEM team, I'd probably rather do development independently and then just integrate stuff when it makes sense to do so. I'm still interested in checking out SEC and seeing the other stuff you guys are into though.

And yea, we should totally meet up sometime. I'm busy tomorrow night, but how about Thursday? Let me know.

Mark

Mark,

6:45 works. I'll see you then in Kirkland.

Aaron

### 6:45 PM EST

Aaron Greenspan, Mark Zuckerberg, Dustin Moskovitz and Toni Marchioni have dinner in the Kirkland House dining hall. Aaron and Mark discuss houseSYSTEM and Mark's project, but only to the extent that it is "on the d-I," implying that details are confidential. Aaron and Mark exchange AOL Instant Messenger screennames (ThinkComp and zberg02, respectively) to communicate in the future.

### 8:09:50 PM EST (Recovered September 12, 2012)

Mark Zuckerberg starts a conversation with Aaron Greenspan on AIM.

**zberg02:** hey man

**zberg02:** this is my sn just in case you didn't catch it before

**ThinkComp:** hey, got it

**zberg02:** i realized i didn't ask you for yours so of course i had to figure it out as soon as i got back

**ThinkComp:** just didn't get to add it yet.

**ThinkComp:** :-)

**zberg02:** i found the path: zberg02 --> kxjin --> americanquixote --> thinkcomp

**ThinkComp:** ah

**ThinkComp:** or you could have looked on the universal facebook :-)

**zberg02:** well that would have been easier

**ThinkComp:** how did you associate thinkcomp with my name though

**zberg02:** i kind of guessed

**zberg02:** you said you made the company in high school

**ThinkComp:** aha

**zberg02:** and that's about the time when people make their sns

**ThinkComp:** a good guess

**zberg02:** well i didn't guess thinkcomp

**zberg02:** but once i saw that i knew it was yours

**ThinkComp:** fair enough

**ThinkComp:** ever seen a virus that makes it say you're out of disk space, when you aren't

**ThinkComp:** ?  
**zberg02:** no, but i don't use windows so i don't have as much experience with viruses as i should have  
**ThinkComp:** i see  
**zberg02:** i assume it's on windows?  
**ThinkComp:** yep  
**ThinkComp:** and a royal pain it is  
**zberg02:** there's no documentation for it anywhere?  
**ThinkComp:** nothing too concrete so far  
**ThinkComp:** this server has been through a lot  
**ThinkComp:** welchia  
**ThinkComp:** trojans  
**ThinkComp:** etc.  
**zberg02:** why windows?  
**ThinkComp:** brb phone  
**zberg02:** did you start off in asp or something?  
**zberg02:** sure  
**ThinkComp:** it's a client's server not mine  
**ThinkComp:** they have a dos app that runs their company  
**ThinkComp:** it's at least 15 years old  
**zberg02:** wow  
**zberg02:** that's pretty backwards  
**ThinkComp:** yep.  
**zberg02:** so you're graduating this year?  
**ThinkComp:** yeah  
**ThinkComp:** i've had my share of harvard  
**ThinkComp:** heh  
**zberg02:** are you getting a job next year or just running thinkcomputer?  
**ThinkComp:** i'd like to run thin computer, but if i can't make enough, i'll probably get a job.  
**ThinkComp:** er, think  
**zberg02:** who are the other people you're running thinkcomp with?  
**ThinkComp:** a friend of mine at mit has done some coding, and a friend here who is now a gov concentrator did too  
**ThinkComp:** two other people back home worked for me in 2001 as programmers, and two others did repair jobs but not very much  
**zberg02:** would it be more profitable to consult through thinkcomp or like work towards marketing products?  
**ThinkComp:** i think in the long term software is definitely more profitable  
**ThinkComp:** but in the short term i have more consulting clients than software  
**zberg02:** i wish good ideas would just market themselves  
**ThinkComp:** hehe  
**ThinkComp:** you're not the only one.  
**zberg02:** that way you could just devote energy into making cool things  
**zberg02:** why did you choose to do ec and not cs?  
**ThinkComp:** part of the challenge is marketing though  
**ThinkComp:** i dont' mind  
**ThinkComp:** because i'm not so good at math  
**ThinkComp:** and i would have died in cs51 and 121  
**ThinkComp:** and i didn't want to die  
**zberg02:** 121 was tricky  
**zberg02:** 51 wasn't much math  
**ThinkComp:** no, but it's still a horrible class  
**ThinkComp:** the material is good

**ThinkComp:** but there is no reason why cs should have to be that bad.  
**zberg02:** yea it's bad  
**zberg02:** okay well i've got to run but it's been good talking to you  
**ThinkComp:** ok  
**ThinkComp:** later  
**zberg02:** remind me to send you a copy of the course listing table i have sometime  
**ThinkComp:** ok, i'll email you  
**zberg02:** bye bye  
**zberg02:** hey man  
**ThinkComp:** hi  
**zberg02:** i have a question  
**ThinkComp:** ok  
**zberg02:** are you interested in doing other things besides the housesystem venture?  
**ThinkComp:** in what context  
**zberg02:** like would you be interested in possibly partnering up to make a site if it would not be incorporated into housesystem  
**ThinkComp:** for the sec? think? or separate  
**zberg02:** separate i guess  
**ThinkComp:** depends on the site i guess  
**zberg02:** well it would be on the new thing i'm working on  
**zberg02:** i could let you know exactly what i was thinking about it, but i'm a little worried that you might just be inclined to want to incorporate it into housesystem  
**zberg02:** which isn't something i want right off the bat, and maybe not at all  
**ThinkComp:** i guess i'd need to see the advantage of starting on something new  
**ThinkComp:** since i've already sort of got a lot going on...  
**ThinkComp:** it's much easier to just incorporate things where they fit from my perspective  
**zberg02:** well i agree  
**zberg02:** but we disagree on whether or not it would fit into housesystem  
**zberg02:** well really i just want to make sure that we're not doing the same thing  
**zberg02:** because then neither of us would succeed i think  
**ThinkComp:** that's fair enough, but i don't understand why it wouldn't fit and why you wouldn't want to take advantage of the existing user base  
**ThinkComp:** especially since i don't know how much people will trust sites you make on your own at this point  
**ThinkComp:** just because of the previous negative publicity  
**zberg02:** yea i hear that  
**zberg02:** i think that house system is a much more professional app  
**zberg02:** and people know it as that  
**ThinkComp:** i really don't think you will get in trouble for being too professional  
**zberg02:** well yea  
**zberg02:** but that sort of makes it less interesting i guess  
**ThinkComp:** i don't think so  
**zberg02:** but it's made up for by its utility  
**zberg02:** like i don't think i'd go to housesystem to procrastinate  
**ThinkComp:** because it looks too nice?  
**ThinkComp:** that seems sort of silly  
**zberg02:** well just because of the functionality that's there presently  
**zberg02:** and people's opinion of it based on that and how it's been marketed  
**ThinkComp:** in that case more time-wasting stuff would balance it out nicely  
**zberg02:** perhaps  
**zberg02:** but i really just want to make sure there's not a lot of overhead  
**zberg02:** i am worried that registration for housesystem requires a lot of info  
**ThinkComp:** yeah, it does

**ThinkComp:** but if 1200 people have filled it out so far, i'm not too worried...

**ThinkComp:** the most frequent reason i've heard for people not signing up for it is that they don't think anyone else is

**ThinkComp:** not that registration is hard

**zberg02:** i'm also a little skeptical about the culture of the site and people's willingness to give information about themselves

**ThinkComp:** or that it's too functional

**zberg02:** yea i agree...it is too functional

**zberg02:** like it's almost overwhelming

**ThinkComp:** well, but it's supposed to be

**zberg02:** like in a site where people give personal information for one thing, it then takes a lot of work and precaution to use that information for something else

**zberg02:** well it's good that it's functional

**zberg02:** it's just a little overwhelming for some people i think'

**ThinkComp:** perhaps

**ThinkComp:** in any case, why do you want me to work on your project then if the stuff i do is at odds with the atmosphere you're trying to create?

**zberg02:** you have good ideas clearly

**zberg02:** it's not that what you do is at odds with the atmosphere i'm trying to create

**zberg02:** it's just the atmosphere of housesystem isn't right i think

**ThinkComp:** from what i can tell it sounds like your idea might again be controversial from the perspectives of other students and administrators

**ThinkComp:** i'm not afraid of controversy clearly

**ThinkComp:** but i might be able to keep in it check as part of housesystem

**ThinkComp:** i'm not so sure i could if i worked on something with you independently

**ThinkComp:** and there's the very real risk that it could blow up in both of our faces, which i'd rather avoid

**ThinkComp:** i guess that's basically how i feel

**zberg02:** yea i don't think it's that controversial actually

**zberg02:** but it's tough for you to know that unless i tell you exactly what it is

**zberg02:** i guess basically it's a souped of version of one thing housesystem does

**zberg02:** which i think didn't do as well as it could have as a stand-alone site

**ThinkComp:** ok

**zberg02:** but it's not like i took the idea from you

**ThinkComp:** sure, i understand

**zberg02:** so i guess the basic jist is that i feel as if it may compete with the facebook you're trying to implement

**ThinkComp:** brb phone

**zberg02:** okay

**ThinkComp:** hey i'm on hold

**zberg02:** okay

**ThinkComp:** so you're going to compete with the facebook?

**zberg02:** i think so

**zberg02:** like it will be slightly different audiences i think

**ThinkComp:** linking faces to courses?

**zberg02:** but in general i think most people won't want to submit their facebook picture to more than one site, do you agree?

**ThinkComp:** i dunno

**ThinkComp:** most people haven't even had the option of sending it to one

**zberg02:** really i see it as a problem of critical mass

**zberg02:** people won't; do it unless other people do it

**ThinkComp:** right

**zberg02:** and then it becomes a question of culture

**zberg02:** because it's not about who's actually doing it  
**ThinkComp:** that's why i'm going to be talking to the uc  
**zberg02:** it's about who people think are doing it  
**zberg02:** i think it requires some hype  
**ThinkComp:** how do you plan to go about that  
**zberg02:** well mine's not a straight facebook  
**zberg02:** it has a bunch of cool features which i don't think i should really mention right now  
**zberg02:** beyond the course stuff  
**zberg02:** and i just think in general people will respond to the next thing i make  
**ThinkComp:** ok  
**zberg02:** a crimson reporter called me today to ask if i was making anything new  
**ThinkComp:** i won't stop you then  
**zberg02:** or planning on making anything new  
**zberg02:** without hearing of anything i was doing  
**zberg02:** i thought that was interesting  
**ThinkComp:** indeed  
**zberg02:** well i just think that if we compete neither of us will get the mass we need to make anything worthwhile  
**zberg02:** or i don't know  
**zberg02:** mine is basically ready  
**zberg02:** i just have some business stuff to work out  
**ThinkComp:** i'm not too concerned.  
**ThinkComp:** we're doing ok  
**zberg02:** well i know you have lots of users  
**zberg02:** i'm just saying, in terms of either facebook getting used  
**ThinkComp:** you said they were different purposes though...  
**zberg02:** yea but people are lazy  
**zberg02:** and i think will only want to upload stuff to one of them  
**ThinkComp:** i guess i don't know that that's true  
**ThinkComp:** what if you made a separate site that drew on the housesystem database in the background  
**ThinkComp:** under the sec  
**ThinkComp:** one upload, one login  
**zberg02:** what is it going to draw from the database?  
**zberg02:** so both will have facebook's?  
**ThinkComp:** yeah  
**ThinkComp:** put it would be a positive feedback loop rather than a negative one  
**ThinkComp:** assuming the administration doesn't take issue with your idea  
**zberg02:** that's an interesting idea  
**zberg02:** what if people don't want to do both sites?  
**ThinkComp:** they don't have to  
**ThinkComp:** but if they sign up for one, they're automatically in the other.  
**zberg02:** would it be possible to add something like that after the site is launched?  
**ThinkComp:** uh  
**ThinkComp:** why would you do it that way?  
**zberg02:** i mean, are you planning on making changes to the housesystem facebook?  
**ThinkComp:** of course  
**zberg02:** so what data will the two draw from each other  
**zberg02:** besides logins?  
**ThinkComp:** member information and facebook information  
**ThinkComp:** though neither site has to display all of it  
**ThinkComp:** it would be sort of like how delta has song airlines  
**zberg02:** delta owns song airlines

**ThinkComp:** right  
**ThinkComp:** your site would be an sec project  
**ThinkComp:** both would benefit  
**zberg02:** that sounds like it could work  
**zberg02:** but it might be a lot of work to modify the stuff i've already done  
**ThinkComp:** what did you write it ib  
**ThinkComp:** er, in  
**zberg02:** some perl, some php  
**zberg02:** all the web stuff is in php  
**ThinkComp:** might work then  
**zberg02:** yea...how fast is your server  
**zberg02:** for housesystem  
**ThinkComp:** not too fast  
**ThinkComp:** 300mhz  
**zberg02:** oh man  
**ThinkComp:** but it works  
**zberg02:** how much ram  
**ThinkComp:** 256  
**zberg02:** there are a lot of cool things that i wanted to do with coursematch that deal with graph theory  
**zberg02:** but it's all pretty computationally intensive  
**ThinkComp:** i see  
**zberg02:** would the sites run off the same server?  
**zberg02:** or just share the database?  
**ThinkComp:** yeah  
**ThinkComp:** same server  
**ThinkComp:** unless you have a different one you could put it on  
**zberg02:** we'll see what i can do  
**zberg02:** i need to go get some work done  
**zberg02:** we'll speak soon  
**ThinkComp:** ok  
**ThinkComp:** bye

## Saturday, January 10, 2004

**1:56:24 PM EST**

Mark Zuckerberg returns to the Kirkland House houseSYSTEM page via a web browser bookmark or by directly typing in its web site address into his web browser's URL bar.

roam175-29.student.harvard.edu - - [10/Jan/2004:13:56:24 -0500] "GET / HTTP/1.1" 200 14779 "-" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**1:56:37 PM EST**

Mark Zuckerberg signs into houseSYSTEM.

roam175-29.student.harvard.edu - - [10/Jan/2004:13:56:37 -0500] "POST /index.html HTTP/1.1" 200 18588 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**1:56:42 PM EST**

Mark Zuckerberg visits the houseSYSTEM Universal Face Book.

roam175-29.student.harvard.edu - - [10/Jan/2004:13:56:42 -0500] "GET /facebook/index.html HTTP/1.1" 200 40723 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**8:36:13 PM EST**

Mark Zuckerberg attempts to visit the houseSYSTEM Universal Face Book, but his session has expired.

```
roam175-29.student.harvard.edu - - [10/Jan/2004:20:36:13 -0500] "GET /facebook/index.html HTTP/1.1" 200 5470 "http://www.kirkland.harvardsec.org/index.html"
"Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

**8:36:19 PM EST**

Six seconds later, Mark Zuckerberg signs into houseSYSTEM.

```
roam175-29.student.harvard.edu - - [10/Jan/2004:20:36:19 -0500] "POST /index.html HTTP/1.1" 200 18926 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0
(X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

**8:36:22 PM EST**

Three seconds later, Mark Zuckerberg successfully visits the houseSYSTEM Universal Face Book.

```
roam175-29.student.harvard.edu - - [10/Jan/2004:20:36:22 -0500] "GET /facebook/index.html HTTP/1.1" 200 40723
"http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"
```

+1.6505434800 Fax: +1.6505434800

Registration Service Provider:  
Lysand LLC  
<http://www.lysand.com/>  
This company may be contacted for domain login/passwords,  
DNS/Nameserver changes, and general domain support questions.

Registrar of Record: TUCOWS, INC.  
Record last updated on 01-Dec-2008.  
Record expires on 23-Dec-2014.  
Record created on 11-Jan-2004.

Registrar Domain Name Help Center:  
<http://domainhelp.tucows.com>

Domain servers in listed order:  
DNS05.SF2P.TFBNW.NET  
DNS04.SF2P.TFBNW.NET

Domain status: clientTransferProhibited  
clientUpdateProhibited

The Data in the Tucows Registrar WHOIS database is provided to you by Tucows for information purposes only, and may be used to assist you in obtaining information about or related to a domain name's registration record.

Tucows makes this information available "as is," and does not guarantee its accuracy.

By submitting a WHOIS query, you agree that you will use this data only for lawful purposes and that, under no circumstances will you use this data to:

a) allow, enable, or otherwise support the transmission by e-mail, telephone, or facsimile of mass, unsolicited, commercial advertising or solicitations to entities other than the data recipient's own existing customers; or (b) enable high volume, automated, electronic processes that send queries or data to the systems of any Registry Operator or ICANN-Accredited registrar, except as reasonably necessary to register domain names or modify existing registrations.

The compilation, repackaging, dissemination or other use of this Data is expressly prohibited without the prior written consent of Tucows.

Tucows reserves the right to terminate your access to the Tucows WHOIS database in its sole discretion, including without limitation, for excessive querying of the WHOIS database or for failure to otherwise abide by this policy.

Tucows reserves the right to modify these terms at any time.

By submitting this query, you agree to abide by these terms.

NOTE: THE WHOIS DATABASE IS A CONTACT DATABASE ONLY. LACK OF A DOMAIN RECORD DOES NOT SIGNIFY DOMAIN AVAILABILITY.

### **2:07:35 PM EST**

Mark Zuckerberg visits houseSYSTEM directly or via bookmark.

roam175-29.student.harvard.edu - - [11/Jan/2004:14:07:35 -0500] "GET / HTTP/1.1" 200 14982 "-" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **2:07:44 PM EST**

Mark Zuckerberg signs into houseSYSTEM.

roam175-29.student.harvard.edu - - [11/Jan/2004:14:07:44 -0500] "POST /index.html HTTP/1.1" 200 18926 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **2:07:50 PM EST**

Six seconds later, Mark Zuckerberg visits the houseSYSTEM Universal Face Book.

roam175-29.student.harvard.edu - - [11/Jan/2004:14:07:50 -0500] "GET /facebook/index.html HTTP/1.1" 200 40723 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **2:09:02 PM EST**

Mark Zuckerberg visits the houseSYSTEM Jobs page.

roam175-29.student.harvard.edu - - [11/Jan/2004:14:09:02 -0500] "GET /jobs/index.html HTTP/1.1" 200 13276 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **2:10:19 PM EST**

Mark Zuckerberg visits the houseSYSTEM CriticalMass course review page.

roam175-29.student.harvard.edu - - [11/Jan/2004:14:10:19 -0500] "GET /criticalmass/index.html HTTP/1.1" 200 16772 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

## **Thursday, January 15, 2004**

### **4:14:04 PM EST**

Mark Zuckerberg comes back to the Kirkland House home page on houseSYSTEM via bookmark or directly.

roam175-29.student.harvard.edu - - [15/Jan/2004:16:14:04 -0500] "GET / HTTP/1.1" 200 14990 "-" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **4:14:15 PM EST**

Mark Zuckerberg signs into houseSYSTEM.

roam175-29.student.harvard.edu - - [15/Jan/2004:16:14:15 -0500] "POST /index.html HTTP/1.1" 200 18934 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**4:14:20 PM EST**

Five seconds later, Mark Zuckerberg visits the houseSYSTEM Universal Face Book.

roam175-29.student.harvard.edu - - [15/Jan/2004:16:14:20 -0500] "GET /facebook/index.html HTTP/1.1" 200 40723 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**Monday, January 19, 2004**

**5:35:57 PM EST**

Mark Zuckerberg comes back to the Kirkland House home page on houseSYSTEM via bookmark or directly.

roam175-29.student.harvard.edu - - [19/Jan/2004:17:35:57 -0500] "GET / HTTP/1.1" 200 14982 "-" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**5:36:07 PM EST**

Ten seconds later, Mark Zuckerberg clicks on the link for the houseSYSTEM Universal Face Book.

roam175-29.student.harvard.edu - - [19/Jan/2004:17:36:07 -0500] "GET /facebook/index.html HTTP/1.1" 200 5470 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**Wednesday, January 21, 2004**

**4:58:15 PM EST**

Mark Zuckerberg comes back to the Kirkland House home page on houseSYSTEM via bookmark or directly.

roam175-29.student.harvard.edu - - [21/Jan/2004:04:58:15 -0500] "GET / HTTP/1.1" 200 14982 "-" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**4:58:36 PM EST**

Mark Zuckerberg signs into houseSYSTEM.

roam175-29.student.harvard.edu - - [21/Jan/2004:04:58:36 -0500] "POST /index.html HTTP/1.1" 200 18607 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**4:58:40 PM EST**

Four seconds later, Mark Zuckerberg visits the houseSYSTEM Universal Face Book.

roam175-29.student.harvard.edu - - [21/Jan/2004:04:58:40 -0500] "GET /facebook/index.html HTTP/1.1" 200 41470 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**Tuesday, January 27, 2004**

**11:52:41 PM EST**

Mark Zuckerberg comes back to the Kirkland House home page on houseSYSTEM via the Harvard College SEC web page for houseSYSTEM.

roam175-29.student.harvard.edu - - [27/Jan/2004:23:52:41 -0500] "GET / HTTP/1.1" 200 14990 "http://www.harvardsec.org/projects/housesystem2.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**11:52:52 PM EST**

Mark Zuckerberg signs into houseSYSTEM.

roam175-29.student.harvard.edu - - [27/Jan/2004:23:52:52 -0500] "POST /index.html HTTP/1.1" 200 18615 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**11:52:54 PM EST**

Mark Zuckerberg visits the houseSYSTEM Universal Face Book.

roam175-29.student.harvard.edu - - [27/Jan/2004:23:52:54 -0500] "GET /facebook/index.html HTTP/1.1" 200 42249 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**Wednesday, February 4, 2004**

**2:21:13 AM EST**

Mark Zuckerberg comes back to the Kirkland House home page on houseSYSTEM via bookmark or directly.

roam175-47.student.harvard.edu - - [04/Feb/2004:02:21:13 -0500] "GET / HTTP/1.1" 200 15306 "-" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**2:21:29 AM EST**

Mark Zuckerberg visits the houseSYSTEM Universal Face Book.

roam175-47.student.harvard.edu - - [04/Feb/2004:02:21:29 -0500] "GET /facebook/index.html HTTP/1.1" 200 46653 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**Approximately 6:00 PM EST**

Mark Zuckerberg's web site thefacebook.com launches to the public.

**11:48:52 PM EST**

Aaron Greenspan signs up for thefacebook.com, and is assigned user ID 82.

## Thursday, February 12, 2004

**3:01:08 PM EST**

Mark Zuckerberg comes back to the Kirkland House home page on houseSYSTEM via bookmark or directly.

roam175-47.student.harvard.edu - - [12/Feb/2004:15:01:08 -0500] "GET / HTTP/1.1" 200 16166 "-" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**3:01:19 PM EST**

Mark Zuckerberg signs into houseSYSTEM.

roam175-47.student.harvard.edu - - [12/Feb/2004:15:01:19 -0500] "POST /index.html HTTP/1.1" 200 19954 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**3:01:22 PM EST**

Mark Zuckerberg visits the houseSYSTEM Universal Face Book.

roam175-47.student.harvard.edu - - [12/Feb/2004:15:01:22 -0500] "GET /facebook/index.html HTTP/1.1" 200 52672 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**3:01:52 PM EST**

Mark Zuckerberg visits the houseSYSTEM home page for Kirkland House after reviewing the site Credits page.

roam175-47.student.harvard.edu - - [12/Feb/2004:15:01:52 -0500] "GET /index.html HTTP/1.1" 200 19954 "http://www.kirkland.harvardsec.org/credits/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

## Saturday, February 14, 2004

11:56:58 AM EST

Mark Zuckerberg signs into houseSYSTEM.

roam175-47.student.harvard.edu - - [14/Feb/2004:23:56:58 -0500] "POST /index.html HTTP/1.1" 200 19956 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

11:57:03 PM EST

Mark Zuckerberg visits the houseSYSTEM Universal Face Book.

roam175-47.student.harvard.edu - - [14/Feb/2004:23:57:03 -0500] "GET /facebook/index.html HTTP/1.1" 200 53833 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

## Sunday, February 15, 2004

12:02:21 PM EST

Mark Zuckerberg comes back to the Kirkland House home page on houseSYSTEM via the introductory houseSYSTEM Flash animation on the Harvard College SEC web site.

roam175-47.student.harvard.edu - - [15/Feb/2004:00:02:21 -0500] "GET / HTTP/1.1" 200 19956 "http://www.harvardsec.org/projects/housesystem.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

## Wednesday, February 25, 2004

4:40:40 PM EST

Mark Zuckerberg starts a conversation with Aaron Greenspan on AIM.

**zberg02:** hey aaron

**ThinkComp:** hi

**zberg02:** your ads for housesystem are using screenshots from my site which you don't have the copyright to

**zberg02:** i have to ask you to take them down

**ThinkComp:** [phone, sorry]

**zberg02:** sure

**ThinkComp:** hi, sorry about that

**zberg02:** no problem

**ThinkComp:** i'll pass along your concerns

**ThinkComp:** i didn't design the poster

**ThinkComp:** and i'm not running the club anymore

**zberg02:** i know

**ThinkComp:** so i'll let them know

**zberg02:** i don't want to be difficult

**ThinkComp:** on the other hand, you freely admitted taking some ideas from housesystem

**ThinkComp:** so i wouldn't push it too hard

**zberg02:** i just don't really want them playing on my name

**zberg02:** when did i do that?

**ThinkComp:** over dinner

**ThinkComp:** in kirkland

**zberg02:** like what?

**ThinkComp:** well, i should rephrase...

**ThinkComp:** as i recall you mentioned that a lot of the features in your site would appear as though they could have been taken from housesystem

**zberg02:** i don't remember saying that

**ThinkComp:** and then i noticed a very similar class scheduler, for example

**zberg02:** i had written that before i met with you  
**zberg02:** anyhow, i don't remember saying anything like that, but the point is, the stuff is decently generic  
**ThinkComp:** it doesn't matter really...i don't mind  
**zberg02:** yea and i don't have a problem with you adding social networking stuff to your site  
**zberg02:** it's fine to share ideas by ideas  
**ThinkComp:** i will tell tum and wentao to take away the screenshot  
**zberg02:** the setup of the ads just suggests that sec made thefacebook  
**zberg02:** or at least that was what was reported to me by a few people  
**ThinkComp:** personally, i don't think so, and you've had plenty of coverage which clearly implies otherwise  
**ThinkComp:** but i will tell them, like i said  
**zberg02:** okay thanks  
**zberg02:** sorry to be a nuisance  
**ThinkComp:** not a problem  
**ThinkComp:** you're right to be concerned  
**ThinkComp:** on the other hand, some competition is always healthy :-)  
**zberg02:** na i totally agree  
**zberg02:** okay man...well thanks for passing that along to whomever is in charge now  
**ThinkComp:** no problem  
**zberg02:** we'll speak soon  
**ThinkComp:** yep  
**ThinkComp:** later

## Wednesday, March 3, 2004

**12:27:44 AM EST**

Mark Zuckerberg comes back to the Kirkland House home page on houseSYSTEM via bookmark or directly.

roam175-47.student.harvard.edu - - [03/Mar/2004:00:27:44 -0500] "GET / HTTP/1.1" 200 16466 "-" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**12:27:54 AM EST**

Mark Zuckerberg signs into houseSYSTEM.

roam175-47.student.harvard.edu - - [03/Mar/2004:00:27:54 -0500] "POST /index.html HTTP/1.1" 200 20562 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**12:27:58 AM EST**

Mark Zuckerberg visits the newly rebranded houseSYSTEM FaceNet.

roam175-47.student.harvard.edu - - [03/Mar/2004:00:27:58 -0500] "GET /facenet/index.html HTTP/1.1" 200 74142 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**12:28:41 AM EST**

Mark Zuckerberg visits the houseSYSTEM FaceNet profile of Lusi Fang.

roam175-47.student.harvard.edu - - [03/Mar/2004:00:28:41 -0500] "GET /facenet/profile.html?id=49 HTTP/1.1" 200 8309 "http://www.kirkland.harvardsec.org/facenet/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

## Friday, March 5, 2004

**12:35:28 AM EST**

Mark Zuckerberg starts a conversation with Aaron Greenspan on AIM.

**zberg02:** hey man  
**ThinkComp:** hi  
**zberg02:** i have a question  
**ThinkComp:** ok  
**zberg02:** when the school said they were going to take disciplinary action against you, what did you have your lawyers tell them?  
**ThinkComp:** my lawyers never talked to them directly  
**ThinkComp:** they gave me advice pretty much daily on how to respond to the university's various things  
**zberg02:** oh okay  
**ThinkComp:** what's up  
**zberg02:** not much  
**ThinkComp:** is harvard harassing you about stuff again?  
**zberg02:** apparently they have a problem with thefacebook i guess  
**zberg02:** although i have no idea  
**ThinkComp:** what is it this time  
**ThinkComp:** copyright again?  
**zberg02:** no idea  
**ThinkComp:** is it from OGC?  
**zberg02:** i got an email from the senior tutor asking if i would be available to meet with him and john o'keefe tomorrow  
**zberg02:** na from my senior tutor  
**ThinkComp:** who the hell is john o'keefe  
**zberg02:** secretary of the ad board  
**ThinkComp:** hmm  
**ThinkComp:** that doesn't sound so good.  
**zberg02:** yea  
**zberg02:** so i feel like i should be able to know what they're going to bring against me before i go into a meeting, you know?  
**ThinkComp:** yeah, i never allowed them to have that meeting.  
**ThinkComp:** for me that was the point of getting the lawyers involved...  
**ThinkComp:** i knew that if they could corner me in university hall i'd be screwed.  
**zberg02:** oh okay  
**zberg02:** yea i have no idea what they want  
**zberg02:** i guess it has to be facebook stuff, but that seems a little ridiculous since it's been over a month  
**ThinkComp:** yeah, i would guess so  
**zberg02:** so what did you tell them?  
**ThinkComp:** usually i'd just methodically respond to each accusation  
**ThinkComp:** and i found enough evidence of harvard conducting borderline illegal activity itself to use against them  
**zberg02:** but you made them tell you the charges without meeting with them  
**zberg02:** yea i feel like they totally harassing me  
**ThinkComp:** i know the feeling  
**ThinkComp:** well, the original charges were lodged when i was on vacation with my family  
**ThinkComp:** they wouldn't let me talk to anyone with technical background  
**ThinkComp:** i offered to show them the source, they refused to see it  
**ThinkComp:** i offered them a tour of the site, they refused that  
**ThinkComp:** i asked to talk to dean gross--he was on vacation and couldn't be disturbed (the irony)  
**zberg02:** haha  
**ThinkComp:** my lawyers advised me basically that they would threaten to sue on grounds on anti-competitive behavior if it came to that

**ThinkComp:** i think harvard was probably reading my email  
**zberg02:** interesting  
**zberg02:** yea i bet they were  
**zberg02:** i think they read mine after facemash  
**ThinkComp:** because their tone changed to reflect the fact that they were not trying to stifle competition quite suddenly  
**ThinkComp:** i also had a meeting with dean kidd that strongly suggested that they had been  
**ThinkComp:** but i brought two other friends to that one to outnumber her, so she behaved pretty well.  
**zberg02:** friends?  
**ThinkComp:** my friends also working on SEC stuff  
**ThinkComp:** but who really didn't have much to do with coding  
**ThinkComp:** i just wanted more people than the administration at all times.  
**zberg02:** yea that's a good point  
**ThinkComp:** bring someone tomorrow.  
**zberg02:** i already told them i wouldn't meet tomorrow  
**ThinkComp:** anyone who's helped you  
**zberg02:** since i have a problem set to work o  
**ThinkComp:** i see :-)  
**ThinkComp:** if they let you get by, that's good.  
**zberg02:** well they can't disrupt my work  
**zberg02:** that's like the point of the school haha  
**ThinkComp:** you'd be surprised.  
**zberg02:** haha  
**ThinkComp:** if there were anything logical about how these people think, none of this would happen.  
**zberg02:** of course  
**zberg02:** yea so i guess i should call up my lawyer  
**ThinkComp:** yeah  
**ThinkComp:** hope s/he's not charging too much  
**zberg02:** such bullshit  
**ThinkComp:** keep me up to date  
**ThinkComp:** maybe something will ring a bell  
**zberg02:** yea i will  
**ThinkComp:** since i've already been through it once :-)  
**zberg02:** haha of course  
**zberg02:** yea that's why i imed you  
**zberg02:** you're like the guy who knows how to deal with this stuff  
**zberg02:** one day we won't have to  
**zberg02:** and that will be awesome  
**ThinkComp:** yeah, i think it's probably a good sign from historical experience.  
**ThinkComp:** seeing as how it indirectly spawned microsoft.  
**zberg02:** i hope so  
**zberg02:** haha  
**zberg02:** okay so i'll keep you posted  
**zberg02:** i need to eat dinner  
**ThinkComp:** cool  
**ThinkComp:** good luck  
**zberg02:** i just finished operating systems  
**zberg02:** thanks bye bye

**Tuesday, March 16, 2004**

**1:14:51 AM EST**

Mark Zuckerberg comes back to the Kirkland House home page on houseSYSTEM via bookmark or directly.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:14:51 -0500] "GET / HTTP/1.1" 200 16781 "-" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**1:15:02 AM EST**

Mark Zuckerberg signs into houseSYSTEM.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:15:02 -0500] "POST /index.html HTTP/1.1" 200 21134 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**1:15:09 AM EST**

Mark Zuckerberg visits the houseSYSTEM Posters page.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:15:09 -0500] "GET /posters/index.html HTTP/1.1" 200 10061 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**1:15:23 AM EST**

Mark Zuckerberg visits the houseSYSTEM Poster page for the SEC's "Technology Workshop Series: Design a Web Site."

roam175-47.student.harvard.edu - - [16/Mar/2004:01:15:23 -0500] "GET /posters/index.html?id=5 HTTP/1.1" 200 10274 "http://www.kirkland.harvardsec.org/posters/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**1:15:38 AM EST**

Mark Zuckerberg visits the houseSYSTEM Posters page.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:15:38 -0500] "GET /posters/index.html HTTP/1.1" 200 10061 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**1:15:47 AM EST**

Mark Zuckerberg views a shuttle schedule (most likely) via the houseSYSTEM home page.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:15:47 -0500] "POST /index.html HTTP/1.1" 200 21134 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**1:15:59 AM EST**

Mark Zuckerberg visits the houseSYSTEM FaceNet page.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:15:59 -0500] "GET /facenet/index.html HTTP/1.1" 200 10391 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**1:16:47 AM EST**

Mark Zuckerberg visits the FaceNet Profile tab on the houseSYSTEM My Account page.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:16:47 -0500] "GET /myaccount/index.html?panel=facenet HTTP/1.1" 200 13292 "http://www.kirkland.harvardsec.org/facenet/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**1:17:00 AM EST**

Mark Zuckerberg visits the Contact Information tab on the houseSYSTEM My Account page.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:17:00 -0500] "GET /myaccount/index.html?panel=contact HTTP/1.1" 200 16078 "http://www.kirkland.harvardsec.org/myaccount/index.html?panel=facenet" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**1:18:33 AM EST**

Mark Zuckerberg updates his houseSYSTEM FaceNet profile settings.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:18:33 -0500] "POST /myaccount/index.html HTTP/1.1" 200 13276 "http://www.kirkland.harvardsec.org/myaccount/index.html?panel=facenet" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:18:49 AM EST

Mark Zuckerberg uploads his photograph to the houseSYSTEM FaceNet.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:18:49 -0500] "POST /myaccount/index.html HTTP/1.1" 200 13329  
"http://www.kirkland.harvardsec.org/myaccount/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:18:49 AM EST

Mark Zuckerberg's web browser downloads the photograph he has just uploaded to the houseSYSTEM FaceNet.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:18:49 -0500] "GET /facenet/d5dca291113900f9722cb9c63d34cf94/90.jpg HTTP/1.1" 200 14366  
"http://www.kirkland.harvardsec.org/myaccount/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:20:41 AM EST

Mark Zuckerberg searches the houseSYSTEM FaceNet for names containing "goodin."

roam175-47.student.harvard.edu - - [16/Mar/2004:01:20:41 -0500] "GET /facenet/search.html?string=goodin&search.x=0&search.y=0 HTTP/1.1" 200 11610  
"http://www.kirkland.harvardsec.org/facenet/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:20:41 AM EST

Mark Zuckerberg's web browser downloads a photograph of Sarah Goodin.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:20:41 -0500] "GET /facenet/d5dca291113900f9722cb9c63d34cf94/27.jpg HTTP/1.1" 200 10842  
"http://www.kirkland.harvardsec.org/facenet/search.html?string=goodin&search.x=0&search.y=0" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:21:24 AM EST

Mark Zuckerberg searches the houseSYSTEM FaceNet for names containing "zuck."

roam175-47.student.harvard.edu - - [16/Mar/2004:01:21:24 -0500] "GET /facenet/search.html?string=zuck&search.x=0&search.y=0 HTTP/1.1" 200 11599  
"http://www.kirkland.harvardsec.org/facenet/search.html?string=goodin&search.x=0&search.y=0" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:21:24 AM EST

Mark Zuckerberg's web browser downloads a photograph of Mark Zuckerberg.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:21:24 -0500] "GET /facenet/d5dca291113900f9722cb9c63d34cf94/90.jpg HTTP/1.1" 304 -  
"http://www.kirkland.harvardsec.org/facenet/search.html?string=zuck&search.x=0&search.y=0" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:22:11 AM EST

Mark Zuckerberg visits the houseSYSTEM FaceNet page after viewing his own profile.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:22:11 -0500] "GET /facenet/index.html HTTP/1.1" 200 13947  
"http://www.kirkland.harvardsec.org/facenet/profile.html?id=90" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:22:22 AM EST

Mark Zuckerberg browses the profiles on the houseSYSTEM FaceNet.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:22:22 -0500] "GET /facenet/browse.html HTTP/1.1" 200 72833  
"http://www.kirkland.harvardsec.org/facenet/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:23:26 AM EST

Mark Zuckerberg visits Aaron Greenspan's profile on the houseSYSTEM FaceNet.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:23:26 -0500] "GET /facenet/profile.html?id=1 HTTP/1.1" 200 16353  
"http://www.kirkland.harvardsec.org/facenet/browse.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:24:12 AM EST

Mark Zuckerberg starts a conversation with Aaron Greenspan on AIM.

**zberg02:** hey man  
**ThinkComp:** hi  
**zberg02:** your facenet thing is hot  
**ThinkComp:** thanks  
**zberg02:** how do i add you as a friend  
**ThinkComp:** go to the main thing and just type greensp  
**ThinkComp:** into the center box  
**ThinkComp:** it's obviously got room for improvement :-)  
**ThinkComp:** such as adding one at a time  
**ThinkComp:** hehe  
**zberg02:** one at a time?  
**ThinkComp:** like you just wanted to  
**zberg02:** oh right haha  
**zberg02:** did you code this yourself?  
**zberg02:** it looks like it has the greenspan touch  
**ThinkComp:** yeah  
**zberg02:** cool  
**zberg02:** are you using graphviz for visualizations?  
**ThinkComp:** i'm trying but it keeps rebooting my damn server.  
**zberg02:** weird  
**ThinkComp:** so i basically shut it off for now  
**zberg02:** you're on linux?  
**ThinkComp:** yeah  
**ThinkComp:** did you compile it with freetype?  
**zberg02:** na  
**zberg02:** what distro are you using/  
**ThinkComp:** it's old  
**ThinkComp:** sun cobalt red hat 5  
**zberg02:** hmm okay  
**ThinkComp:** really, really old.  
**ThinkComp:** this server is from 2000.  
**zberg02:** yea i'm using rh9  
**zberg02:** so what i did  
**ThinkComp:** it's doing ok for a 300MHz AMD chip though :-)  
**zberg02:** was reinstall tcl and tk  
**zberg02:** v8.4 on those  
**ThinkComp:** i'm not even compiling those packages i don't think  
**ThinkComp:** maybe i should though.  
**zberg02:** i can send you source package i used for graphviz but it's probably different  
**ThinkComp:** it's ok, i've got a bunch  
**ThinkComp:** thanks though  
**ThinkComp:** at&t people seem pretty stumped  
**ThinkComp:** i am too  
**zberg02:** haha yea  
**zberg02:** they're helping you out?  
**ThinkComp:** yeah  
**ThinkComp:** they've been really nice  
**zberg02:** that's cool  
**zberg02:** just randomly?  
**ThinkComp:** it'll work perfectly three times in a row  
**ThinkComp:** and then crash on the fourth  
**ThinkComp:** or on the seventh  
**ThinkComp:** it seems totally random

**zberg02:** what are you using to generate the svgz?  
**zberg02:** neato?  
**ThinkComp:** neato, but i'm not using SVG.  
**zberg02:** oh right  
**zberg02:** you're doing pdf  
**ThinkComp:** yeah  
**zberg02:** i guess pdf is more universal haha  
**ThinkComp:** yep :-)  
**zberg02:** i got the thing working over a year ago for my friend who made buddyzoo  
**ThinkComp:** cool  
**zberg02:** and then i just reused the code i had written for that  
**ThinkComp:** it's a nice program  
**ThinkComp:** if only it didn't break :-)  
**zberg02:** yea haha  
**zberg02:** how do i add a course as my favorite?  
**ThinkComp:** go to criticalmass  
**zberg02:** i'm clearly bad at this  
**zberg02:** yea i'm in that  
**ThinkComp:** no, it's not you.  
**ThinkComp:** the UI needs work  
**ThinkComp:** under Lists  
**ThinkComp:** my favorite list i think?  
**zberg02:** oh right  
**zberg02:** gotcha  
**zberg02:** no that's pretty obvious  
**zberg02:** i just browsed to the course profile  
**zberg02:** thinking that there would be a link there  
**ThinkComp:** yeah there should be  
**ThinkComp:** you may run into a bug with the ranking once you add the first course...  
**ThinkComp:** i've gotta fix that.  
**zberg02:** eh get one of your people to do that haha  
**ThinkComp:** there are no other programming people  
**ThinkComp:** heh  
**ThinkComp:** just marketing  
**zberg02:** so what's going to happen next year?  
**ThinkComp:** and membership  
**ThinkComp:** someone's gonna learn how to code with my software :-)  
**zberg02:** are you going to keep running any of this stuff after you graduate?  
**zberg02:** it would probably be better not having to play by harvard's rules haha  
**zberg02:** anyhow, i need to go learn some psych before wednesday  
**zberg02:** i'll let you know if i think of anything that i had to deal with while making graphviz work  
**zberg02:** bye bye

**1:24:48 AM EST**

Mark Zuckerberg adds Aaron Greenspan as a "friend" on the houseSYSTEM FaceNet.

-----  
houseSYSTEM FaceNet Confirmation Notice  
-----

March 16, 2004, 1:24 AM EST

Dear Aaron,

You have been added to Mark Zuckerberg's list of friends on the houseSYSTEM FaceNet. To confirm the listing, just sign into your houseSYSTEM account at:

<http://www.lowell.harvardsec.org/facenet/confirm.html>

If you have any questions or problems, feel free to e-mail the houseSYSTEM administrator at [info@harvardsec.org](mailto:info@harvardsec.org).

-----  
Harvard College Student Entrepreneurship Council

<http://www.harvardsec.org>

### **1:25:14 AM EST**

Mark Zuckerberg visits the houseSYSTEM FaceNet "draw your network" page, which he had discussed with Aaron Greenspan, and which created an Adobe Acrobat PDF diagram of one's social network.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:25:14 -0500] "GET /facenet/draw.html HTTP/1.1" 200 8764  
"http://www.kirkland.harvardsec.org/facenet/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **1:33:34 AM EST**

Mark Zuckerberg searches the houseSYSTEM FaceNet for names containing "berkman."

roam175-47.student.harvard.edu - - [16/Mar/2004:01:33:34 -0500] "GET /facenet/search.html?string=berkman&search.x=0&search.y=0 HTTP/1.1" 200 11611  
"http://www.kirkland.harvardsec.org/facenet/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **1:33:46 AM EST**

Mark Zuckerberg searches the houseSYSTEM FaceNet for names containing "zuck."

roam175-47.student.harvard.edu - - [16/Mar/2004:01:33:46 -0500] "GET /facenet/search.html?string=zuck&search.x=0&search.y=0 HTTP/1.1" 200 11599  
"http://www.kirkland.harvardsec.org/facenet/search.html?string=berkman&search.x=0&search.y=0" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **1:33:46 AM EST**

Mark Zuckerberg's web browser downloads a photograph of Mark Zuckerberg.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:33:46 -0500] "GET /facenet/d5dca291113900f9722cb9c63d34cf94/90.jpg HTTP/1.1" 304 -  
"http://www.kirkland.harvardsec.org/facenet/search.html?string=zuck&search.x=0&search.y=0" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **1:33:58 AM EST**

Mark Zuckerberg visits his own profile on the houseSYSTEM FaceNet.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:33:58 -0500] "GET /facenet/profile.html?id=90 HTTP/1.1" 200 13785  
"http://www.kirkland.harvardsec.org/facenet/search.html?string=zuck&search.x=0&search.y=0" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **1:34:17 AM EST**

Mark Zuckerberg visits the houseSYSTEM CriticalMass page after viewing his own profile.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:34:17 -0500] "GET /criticalmass/index.html HTTP/1.1" 200 17424  
"http://www.kirkland.harvardsec.org/facenet/profile.html?id=90" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **1:40:59 AM EST**

Mark Zuckerberg begins to add a course to his CriticalMass favorite courses list.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:40:59 -0500] "POST /criticalmass/lists/favoritelist.html HTTP/1.1"

200 8946 "http://www.kirkland.harvardsec.org/criticalmass/lists/favoritelist.html?add=1" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

#### **1:42:23 AM EST**

Mark Zuckerberg goes back to the Kirkland House home page on houseSYSTEM.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:42:23 -0500] "GET /index.html HTTP/1.1" 200 21543  
"http://www.kirkland.harvardsec.org/criticalmass/lists/favoritelist.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

#### **1:42:39 AM EST**

Mark Zuckerberg visits his own profile on the houseSYSTEM FaceNet.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:42:39 -0500] "GET /facenet/profile.html?id=90 HTTP/1.1" 200 13785  
"http://www.kirkland.harvardsec.org/facenet/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

#### **1:42:39 AM EST**

Mark Zuckerberg visits Aaron Greenspan's profile on the houseSYSTEM FaceNet.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:45:58 -0500] "GET /facenet/profile.html?id=1 HTTP/1.1" 200 16353  
"http://www.kirkland.harvardsec.org/facenet/profile.html?id=90" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

#### **1:46:17 AM EST**

Mark Zuckerberg visits the houseSYSTEM Student Exchange page.

roam175-47.student.harvard.edu - - [16/Mar/2004:01:46:17 -0500] "GET /exchange/index.html HTTP/1.1" 200 22654  
"http://www.kirkland.harvardsec.org/facenet/profile.html?id=1" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

#### **4:28:39 AM EST**

Mark Zuckerberg comes back to the Kirkland House home page on houseSYSTEM via bookmark or directly.

roam175-47.student.harvard.edu - - [16/Mar/2004:04:28:39 -0500] "GET / HTTP/1.1" 200 16790 "-" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

#### **4:28:47 AM EST**

Mark Zuckerberg signs into houseSYSTEM.

roam175-47.student.harvard.edu - - [16/Mar/2004:04:28:47 -0500] "POST /index.html HTTP/1.1" 200 21552 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

#### **4:28:52 AM EST**

Mark Zuckerberg visits the houseSYSTEM FaceNet page.

roam175-47.student.harvard.edu - - [16/Mar/2004:04:28:52 -0500] "GET /facenet/index.html HTTP/1.1" 200 15795 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

#### **4:29:57 AM EST**

Mark Zuckerberg visits Cameron Winklevoss's profile on the houseSYSTEM FaceNet.

roam175-47.student.harvard.edu - - [16/Mar/2004:04:29:57 -0500] "GET /facenet/profile.html?id=79 HTTP/1.1" 200 12103

### **2:00:03 AM EST**

Mark Zuckerberg attempts to sign into houseSYSTEM.

roam175-47.student.harvard.edu - - [22/Mar/2004:02:00:03 -0500] "POST /index.html HTTP/1.1" 200 21002 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **2:00:12 AM EST**

Mark Zuckerberg signs into houseSYSTEM.

roam175-47.student.harvard.edu - - [22/Mar/2004:02:00:12 -0500] "POST /index.html HTTP/1.1" 200 21002 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **2:00:43 AM EST**

Mark Zuckerberg visits the houseSYSTEM FaceNet page.

roam175-47.student.harvard.edu - - [22/Mar/2004:02:00:43 -0500] "GET /facenet/index.html HTTP/1.1" 200 16783 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **2:02:25 AM EST**

Mark Zuckerberg visits Kemi George's profile on the houseSYSTEM FaceNet.

roam175-47.student.harvard.edu - - [22/Mar/2004:02:02:25 -0500] "GET /facenet/profile.html?id=89 HTTP/1.1" 200 12709 "http://www.kirkland.harvardsec.org/facenet/browse.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### **2:02:40 PM EST**

Mark Zuckerberg visits the houseSYSTEM Posters page.

roam175-47.student.harvard.edu - - [22/Mar/2004:02:02:40 -0500] "GET /posters/index.html HTTP/1.1" 200 10975  
"http://www.kirkland.harvardsec.org/facenet/profile.html?id=89" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:25:17 PM EST

Mark Zuckerberg searches the houseSYSTEM FaceNet for names containing "winkle."

roam175-47.student.harvard.edu - - [22/Mar/2004:13:25:17 -0500] "GET /facenet/search.html?string=winkle&search.x=0&search.y=0 HTTP/1.1" 200 8504  
"http://www.kirkland.harvardsec.org/facenet/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:25:22 PM EST

Mark Zuckerberg searches the houseSYSTEM FaceNet for names containing "wink."

roam175-47.student.harvard.edu - - [22/Mar/2004:13:25:22 -0500] "GET /facenet/search.html?string=wink&search.x=0&search.y=0 HTTP/1.1" 200 8504  
"http://www.kirkland.harvardsec.org/facenet/search.html?string=winkle&search.x=0&search.y=0" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:25:32 PM EST

Mark Zuckerberg searches the houseSYSTEM FaceNet for names containing "zuck."

roam175-47.student.harvard.edu - - [22/Mar/2004:13:25:32 -0500] "GET /facenet/search.html?string=zuck&search.x=0&search.y=0 HTTP/1.1" 200 8504  
"http://www.kirkland.harvardsec.org/facenet/search.html?string=wink&search.x=0&search.y=0" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:25:38 PM EST

Mark Zuckerberg searches the houseSYSTEM FaceNet for names containing "zuckerberg."

roam175-47.student.harvard.edu - - [22/Mar/2004:13:25:38 -0500] "GET /facenet/search.html?string=zuckerberg&search.x=0&search.y=0 HTTP/1.1" 200 12536  
"http://www.kirkland.harvardsec.org/facenet/search.html?string=zuck&search.x=0&search.y=0" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:27:26 PM EST

Mark Zuckerberg visits the houseSYSTEM Student Exchange page.

roam175-47.student.harvard.edu - - [22/Mar/2004:13:27:26 -0500] "GET /exchange/index.html HTTP/1.1" 200 22680  
"http://www.kirkland.harvardsec.org/facenet/profile.html?id=10" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 1:28:31 PM EST

Mark Zuckerberg visits the houseSYSTEM Message Board page.

roam175-47.student.harvard.edu - - [22/Mar/2004:13:28:31 -0500] "GET /board/index.html HTTP/1.1" 200 17807  
"http://www.kirkland.harvardsec.org/exchange/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 8:16:20 PM EST

Mark Zuckerberg comes back to the Kirkland House home page on houseSYSTEM via bookmark or directly.

roam175-47.student.harvard.edu - - [22/Mar/2004:20:16:20 -0500] "GET / HTTP/1.1" 200 16374 "-" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 8:16:30 PM EST

Mark Zuckerberg signs into houseSYSTEM.

roam175-47.student.harvard.edu - - [22/Mar/2004:20:16:30 -0500] "POST /index.html HTTP/1.1" 200 21001 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 8:16:55 PM EST

Mark Zuckerberg searches CriticalMass on houseSYSTEM for courses in the Computer Science department.

roam175-47.student.harvard.edu - - [22/Mar/2004:20:16:55 -0500] "POST /criticalmass/courses/index.html HTTP/1.1" 200 26873  
"http://www.kirkland.harvardsec.org/criticalmass/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

### 8:17:01 PM EST

Mark Zuckerberg visits the houseSYSTEM CriticalMass course profile for "COMPSCI 124: Data Structures and Algorithms."

roam175-47.student.harvard.edu - - [22/Mar/2004:20:17:01 -0500] "GET /criticalmass/courses/courseprofile.html?id=2426 HTTP/1.1" 200 10540 "http://www.kirkland.harvardsec.org/criticalmass/courses/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**8:17:32 PM EST**

Mark Zuckerberg visits the houseSYSTEM FaceNet page.

roam175-47.student.harvard.edu - - [22/Mar/2004:20:17:32 -0500] "GET /facenet/index.html HTTP/1.1" 200 16783 "http://www.kirkland.harvardsec.org/criticalmass/courses/courseprofile.html?id=2426" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**Friday, March 26, 2004**

**12:21:16 AM EST**

Mark Zuckerberg comes back to the Kirkland House home page on houseSYSTEM via bookmark or directly.

roam175-47.student.harvard.edu - - [26/Mar/2004:00:21:16 -0500] "GET / HTTP/1.1" 200 16053 "-" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**12:21:29 AM EST**

Mark Zuckerberg signs into houseSYSTEM.

roam175-47.student.harvard.edu - - [26/Mar/2004:00:21:29 -0500] "POST /index.html HTTP/1.1" 200 20527 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

## Friday, April 9, 2004

### 5:08:06 PM EDT (Recovered September 12, 2012)

Mark Zuckerberg starts a conversation with Aaron Greenspan on AIM.

**zberg02:** hey man

**ThinkComp:** hi

**zberg02:** i have a random computer question

**ThinkComp:** ok

**zberg02:** do you know stuff about xeons?

**zberg02:** like performance specs

**ThinkComp:** not a ton

**zberg02:** okay you might still know this though  
**ThinkComp:** just that they're fast :-)  
**zberg02:** like how much better should a dual 2.8 system with gb of ram perform than two individual systems with pentium 2.8s and 1gb ram?  
**zberg02:** like theoretically they should be the same, but it's definitely not  
**ThinkComp:** it depends on the software  
**ThinkComp:** if the software isn't designed for parallel processing, there should be 0 difference  
**zberg02:** so a the dual xeon perform just as well as two separate cpus?  
**ThinkComp:** they should perform better  
**ThinkComp:** much better  
**ThinkComp:** but not unless the software is optimized for it  
**ThinkComp:** if the software isn't designed for a multi-processor platform the second CPU is just gonna sit idle  
**ThinkComp:** either that or i imagine the load could be distributed evenly, but that wouldn't really result in any gain  
**zberg02:** wait i'm confused (i know this isn't that hard but still...)  
**zberg02:** i'm talking about 1 dual xeon computer vs. 2 computers with 1 processor each  
**zberg02:** are you just talking about the dual xeon vs. 1 computer with 1 processor?  
**ThinkComp:** sorry  
**zberg02:** or do are you talking about 2 computers with 1 processor also  
**ThinkComp:** let me reread your question :-)  
**zberg02:** haha okay  
**ThinkComp:** i guess i don't understand the question because how are you hooking the two separate computers together?  
**zberg02:** like i think my friend is talking about web serving  
**ThinkComp:** the only thing you can really compare is a two cpu system vs a one cpu system  
**zberg02:** so he'd either do load balancing  
**zberg02:** or have one server  
**ThinkComp:** oh, that's a totally different kind of thing though  
**zberg02:** and he has no idea what's better  
**ThinkComp:** you'd definitely do load balancing for that  
**zberg02:** and i have no idea what's better haha  
**ThinkComp:** because apache isn't written for multiple cpus i dont think  
**ThinkComp:** assuming you're using apache  
**ThinkComp:** and load balancing is more scalable  
**ThinkComp:** since you can only really fit 4 cpus on a motherboard  
**zberg02:** yea he's on linux i'm pretty sure  
**ThinkComp:** having a two cpu system would probably be a waste, and it might also be hard to find correct drivers for linux  
**zberg02:** hmm good point on the drivers  
**zberg02:** oh okay here's what he said  
**zberg02:** he's going to host with hurricane electric  
**zberg02:** and they charge \$200/month for tech support on each server  
**ThinkComp:** wow  
**ThinkComp:** that's a lot.  
**zberg02:** so he was wondering if it's more cost efficient to get a dual processor system, since that would only need to be supported once  
**zberg02:** yea  
**ThinkComp:** it's always more cost efficient to have fewer computers :-)  
**ThinkComp:** but is he going for cost or speed?  
**ThinkComp:** or not even speed, more like reliability  
**zberg02:** dual cpus are less reliable?

**ThinkComp:** the only reason you would need load balancing in the first place is if you're really going to have too many hits for one server to handle

**ThinkComp:** if you get too many hits on one machine, it can go down, meaning lower uptime.

**ThinkComp:** or what i'm calling reliability

**zberg02:** well he could also get like 2 dual xeon instead of 3 single processor systems

**zberg02:** but i think he doesn't need that much

**ThinkComp:** how many hits does this site get?

**zberg02:** so he does vision recognition stuff

**zberg02:** and the downloads are pretty big i guess

**ThinkComp:** it shouldn't matter how big they are

**ThinkComp:** just how many

**zberg02:** yea good point

**zberg02:** like 500k/day he's expecting

**zberg02:** i think he's wrong haha

**ThinkComp:** you don't need anything fancy for that

**zberg02:** he definitely has money to burn, but i'm trying to convince him not to burn it all haha

**ThinkComp:** my server does more than 500K per day, and it's four years old.

**zberg02:** fair enough

**ThinkComp:** oh wait

**ThinkComp:** 500KB?

**ThinkComp:** or 500,000 hits?

**ThinkComp:** hehe

**zberg02:** 500,000 hits

**ThinkComp:** my server handles more than 500KB

**ThinkComp:** not 500,000 hits.

**ThinkComp:** heh

**ThinkComp:** ok, that's a lot of hits. so i'd get two servers.

**ThinkComp:** and if it seems like a waste after the first month

**ThinkComp:** he can always scale down to one

**zberg02:** yea true

**zberg02:** so dual cpus wouldn't really help you deal with the load that much?

**ThinkComp:** no

**ThinkComp:** the CPU will likely be at 10% utilization

**ThinkComp:** web serving is not hard

**ThinkComp:** the linux thread limit is what will kill it

**zberg02:** he does some database stuff though

**zberg02:** not that that's hard either

**ThinkComp:** that shouldn't be that hard either

**zberg02:** i should just tell him to figure it out

**ThinkComp:** hehe

**zberg02:** it clearly isn't a problem at all

**zberg02:** and he's just being extravagant

**ThinkComp:** does he really get half a million hits a day?

**zberg02:** he doesn't have a site yet haha

**zberg02:** but he has ideas about that kind of stuff

**zberg02:** he was the kid who made buddyzoo last year

**zberg02:** not sure if you ever checked that out

**ThinkComp:** no, i've heard of it.

**ThinkComp:** if he doesn't have a site

**ThinkComp:** then why doesn't he just start with one and scale up?

**zberg02:** because he likes messing around with cool things

**zberg02:** and he's never had a dual cpu system before haha

**zberg02:** that's my guess

**zberg02:** okay i'm going to get some dinner  
**zberg02:** but thanks for the answers  
**zberg02:** you are clearly the person who knows stuff about this  
**ThinkComp:** no problem  
**zberg02:** so every time i have a question i'm going to ask you from now on  
**zberg02:** just kidding  
**ThinkComp:** hehe  
**zberg02:** i won't annoy you  
**zberg02:** okay bye bye man  
**ThinkComp:** later

## Wednesday, April 14, 2004

**2:57:13 PM EDT**

Mark Zuckerberg comes back to the Kirkland House home page on houseSYSTEM via bookmark or directly.

roam175-47.student.harvard.edu - - [14/Apr/2004:14:57:13 -0400] "GET / HTTP/1.1" 200 17184 "-" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**2:57:22 PM EDT**

Mark Zuckerberg signs into houseSYSTEM.

roam175-47.student.harvard.edu - - [14/Apr/2004:14:57:22 -0400] "POST /index.html HTTP/1.1" 200 22144 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

**2:57:45 PM EDT**

Mark Zuckerberg visits the houseSYSTEM FaceNet page.

roam175-47.student.harvard.edu - - [14/Apr/2004:14:57:45 -0400] "GET /facenet/index.html HTTP/1.1" 200 16783 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (X11; U; Linux i686; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

## Tuesday, April 20, 2004

**12:10:06 AM EDT (Recovered September 12, 2012)**

Aaron Greenspan starts a conversation with Mark Zuckerberg on AIM.

**ThinkComp:** so i'm curious  
**ThinkComp:** how are you paying people real well for it  
**zberg02:** hey  
**ThinkComp:** hi  
**zberg02:** so we're getting ads  
**zberg02:** and since we get 3 million hits a day  
**zberg02:** we can pay people well  
**ThinkComp:** cool  
**zberg02:** and then once we have enough money we just take down the ads  
**ThinkComp:** hmm, i don't know about that.  
**ThinkComp:** beware the ad companies.  
**zberg02:** haha how so?  
**ThinkComp:** they have contracts  
**ThinkComp:** and they will not be in your favor  
**zberg02:** well yea  
**zberg02:** we're doing premium google ads for example  
**ThinkComp:** oh that's good  
**ThinkComp:** google is good

**zberg02:** you know how you can arrange a cpm rate if you have over 15 million a month  
**zberg02:** but yea conventional ad companies are sketchy  
**ThinkComp:** indeed they are.  
**ThinkComp:** fair enough, i was just wondering  
**zberg02:** anyhow...i haven't decided what real well is yet haha  
**ThinkComp:** sounds cool :-)  
**zberg02:** but probably like 8k  
**zberg02:** i think that qualifies as real cool  
**zberg02:** real well  
**zberg02:** not real cool  
**ThinkComp:** definitely  
**zberg02:** anyhow, someone from uc emailed me to tell me they were probably going to put a link for housesystem up  
**zberg02:** they thought i'd be upset  
**zberg02:** i was like "dude, do it"  
**ThinkComp:** they're idiots.  
**zberg02:** haha  
**ThinkComp:** they paid us to license housesystem  
**ThinkComp:** then they took down the link  
**ThinkComp:** i don't care  
**zberg02:** haha are you kidding  
**zberg02:** that's awesome  
**ThinkComp:** no  
**ThinkComp:** it sucks for the students though  
**ThinkComp:** so i guess it would be nice if they put it back up  
**ThinkComp:** they didn't even invite me to the meeting they had on saturday about that.  
**zberg02:** what do they get by licensing it?  
**ThinkComp:** the customized UC version of student exchange  
**zberg02:** oh cool  
**zberg02:** you should release housesystem for other schools  
**ThinkComp:** i don't want to release it though  
**zberg02:** i bet you could sell it to the student governments  
**ThinkComp:** i want them to buy it.  
**ThinkComp:** student governments don't have enough money  
**zberg02:** yea well that's what i mean  
**zberg02:** yea true  
**ThinkComp:** i want the schools to buy it  
**ThinkComp:** don't worry, working on that :-)  
**zberg02:** is that what your business slaves are doing?  
**ThinkComp:** i have no business slaves hehe  
**zberg02:** haha right  
**ThinkComp:** i am the slave  
**zberg02:** one man army  
**zberg02:** only way to make sure it gets done  
**ThinkComp:** true enough  
**zberg02:** so when you graduate, do you still own the rights to housesystem?  
**ThinkComp:** yeah, think computer corporation owns the copyright.  
**ThinkComp:** it's licensed to the SEC.  
**zberg02:** nice  
**zberg02:** way to be  
**ThinkComp:** with a provision that it cannot be transferred to anyone else, including any parent organization of the licensee  
**zberg02:** haha

**zberg02:** so is this a part of the gameplan for next year?  
**zberg02:** sell housesystem to colleges?  
**ThinkComp:** maybe. not really sure.  
**ThinkComp:** it would be nice, but i'm not counting on it.  
**ThinkComp:** it's a tough sell.  
**zberg02:** these guys have been in contact with me aboutt hefacebook -- they really want to invest in it or something  
**zberg02:** but they want to turn it into a portal  
**zberg02:** i bet you could just like sell housesystem to them  
**ThinkComp:** heh  
**ThinkComp:** are these people serious or just looking for money  
**zberg02:** they're like greenwich types  
**zberg02:** you're not from greenwich, right? haha  
**ThinkComp:** nope  
**ThinkComp:** i don't even know what one is  
**zberg02:** haha just making sure  
**ThinkComp:** i mean, i know where greenwich, CT is  
**ThinkComp:** just not what a "type" is  
**zberg02:** yea there's just like a lot of bankers there and stuff  
**zberg02:** and people who invest in little companies  
**zberg02:** like small scale vc type of stuff  
**ThinkComp:** i see  
**ThinkComp:** they're probably evil then  
**zberg02:** yea of course  
**zberg02:** i always figured that if someone wanted to buy a part of what you have, that probably means it's worth holding on to  
**zberg02:** because business people are the hardest to convince that a product's worth something  
**zberg02:** if they're at all smart  
**zberg02:** okay i need to go grab some food  
**ThinkComp:** ok, ttyl  
**zberg02:** just finished operating systems and realized i haven't eaten in like 24 hours  
**ThinkComp:** see you tomorrow  
**ThinkComp:** go eat :-)  
**zberg02:** bye bye

## Monday, May 10, 2004

9:04:03 PM EDT

Mark Zuckerberg starts a conversation with Aaron Greenspan on AIM.

**zberg02:** hey man  
**ThinkComp:** hi  
**zberg02:** what do you need from me for 91r tomorrow?  
**ThinkComp:** can you run your code on the sets i uploaded?  
**ThinkComp:** for muppets and chemistry?  
**ThinkComp:** or show me how  
**zberg02:** i can just do it  
**zberg02:** how many things are there?  
**ThinkComp:** should be 4  
**ThinkComp:** muppets and chemistry  
**ThinkComp:** testing and training  
**ThinkComp:** the folders are pretty self explanatory  
**zberg02:** how many utterances in each file?

**ThinkComp:** i dont remember, but there are text files there that should say  
**zberg02:** okay cool  
**zberg02:** and i'll just upload when i'm done  
**ThinkComp:** ok  
**zberg02:** has lucas already done his?  
**ThinkComp:** sounds good  
**ThinkComp:** i've got to do that tonight  
**ThinkComp:** he sent it to me a while ago  
**zberg02:** i still don't understand why he made his own fft instead of just helpin me finish mine  
**zberg02:** i was basically done anyhow  
**ThinkComp:** you'd have to ask him...i don't know  
**ThinkComp:** it doesn't hurt to have two though  
**zberg02:** i guess  
**zberg02:** it was just sort of odd  
**zberg02:** because instead of helping me do mine by getting his viz running or looking at my code, he just like did my work by himself  
**zberg02:** which doesn't help me figure out what's going on at all haha  
**ThinkComp:** maybe he wasn't sure whether you would be able to finish  
**zberg02:** yea i don't know  
**zberg02:** it just seemed that if we had worked together we could have come up with a good one  
**zberg02:** instead of two okay ones  
**ThinkComp:** i agree with you, but you have to look at it from his point of view too  
**ThinkComp:** you were pretty hard to get in touch with for a while  
**zberg02:** eh  
**zberg02:** he's the one who didn't return my emails  
**zberg02:** and on the weekend we were going to work on stuff, he went to ny  
**zberg02:** then came back and decided that since there was only one night he'd work on it himself  
**ThinkComp:** i really shouldn't get in the middle of it  
**ThinkComp:** but it seems like neither of you are blameless  
**ThinkComp:** so we should just do the best with what we have  
**zberg02:** yea fair enough  
**zberg02:** i'm not asking you to take sides or anything  
**ThinkComp:** i understand--i just don't want to inadvertently  
**zberg02:** it just seems to me like the more i hear about it, he's lied to a bunch of people  
**zberg02:** like i don't know if he said that i was hard to get in touch with  
**zberg02:** but that just surprised me because he's the one who hasn't returned the emails  
**zberg02:** but whatever i don't really care i'm pretty chill about that kind of stuff  
**ThinkComp:** well, it won't help to point it out to me  
**ThinkComp:** if you think he was really lying, i'd email paul with the emails he sent  
**ThinkComp:** and never responded to  
**ThinkComp:** just to make sure it doesn't impact your grade  
**zberg02:** na i'm just saying why it sounded like i may have been accusing him  
**zberg02:** i was just surprised  
**zberg02:** i don't know  
**zberg02:** i don't really feel comfortable emailing paul being like "lucas is doing..."  
**zberg02:** i doubt it will really affect my grade as long as the thing gets done  
**zberg02:** or maybe i'm wrong?  
**ThinkComp:** i think you're probably right.  
**zberg02 is away at 9:17:59 PM.**  
**ThinkComp:** in that the best solution is just to get the code done  
**Auto response from zberg02: Sorry, I ran out for a bit!**  
**zberg02 returned at 9:18:01 PM.**  
**zberg02:** i don't know why my computer randomly sets me as away

**ThinkComp:** but, if you think someone has been blatantly lying about you, i don't think it's necessarily bad to say so  
**ThinkComp:** it just depends on how much you care  
**ThinkComp:** if you don't care, then i wouldn't worry about it  
**zberg02:** well lucas is a tool  
**zberg02:** i don't care what he says  
**zberg02:** if it will actually negatively affect my grade then that may be something worth addressing  
**zberg02:** but not just to counteract what someone said, you know?  
**ThinkComp:** i agree  
**zberg02:** anyhow, i'll upload that stuff tonight  
**ThinkComp:** ok  
**ThinkComp:** sounds good  
**zberg02:** or do you just want me to send it to you?  
**ThinkComp:** uploading it would be good  
**ThinkComp:** especially if you have any new code to check in  
**zberg02:** yea i don't think i checked in last week  
**zberg02 is idle at 10:29:00 PM.**  
**zberg02 is no longer idle at 10:29:38 PM.**  
**zberg02 is away at 10:39:11 PM.**

**Tuesday, May 11, 2004**

**2:39:23 PM EDT**

Mark Zuckerberg starts a conversation with Aaron Greenspan on AIM.

**zberg02:** hey man  
**ThinkComp:** hi  
**zberg02:** so i have a meeting today and i can't go to class  
**zberg02:** but i uploaded the spps  
**ThinkComp:** ok  
**zberg02:** and everything looks fine  
**ThinkComp:** thanks  
**ThinkComp:** is the latest version of your processor checked in?  
**zberg02:** they're in the chem/testing, chem/training, muppets/testing and muppets/training folders  
**zberg02:** yea it's in signal processing  
**ThinkComp:** great  
**ThinkComp:** thanks!  
**zberg02:** it's kind of poorly organized  
**zberg02:** there are three files  
**zberg02:** you run window.php  
**zberg02:** but the file it runs on is hard-coded into the file at the top  
**zberg02:** which is bad for general use  
**ThinkComp:** yeah...that's gonna have to change pretty soon :-)  
**zberg02 is away at 2:41:40 PM.**  
**zberg02:** yea well it's like a line of code  
**zberg02:** but i'm just saying for now  
**ThinkComp:** it's fine for now, but next week there can't be any hard coding.  
**zberg02:** yea of course  
**zberg02:** okay man i've got to go get dressed  
**ThinkComp:** ok later  
**zberg02:** peace

## Monday, May 17, 2004

2:21:52 PM EDT

Mark Zuckerberg starts a conversation with Aaron Greenspan on AIM.

**zberg02:** hey ,am  
**zberg02:** is no longer idle at 2:21:52 PM.  
**zberg02:** man  
**zberg02:** just woke up  
**ThinkComp:** hi  
**zberg02:** there are now two driver functions  
**zberg02:** the one that gets called by globally  
**zberg02:** and one that gets called from within the parse function  
**zberg02:** to do one utterance at a time  
**ThinkComp:** will you be there at 3?  
**zberg02:** they are right next to each other in the code  
**zberg02:** yea  
**ThinkComp:** you'll have to explain it then  
**ThinkComp:** i can't work on it now  
**ThinkComp:** sorry  
**zberg02:** okay  
**zberg02:** i'll see you then  
**ThinkComp:** ok  
**ThinkComp:** later  
**zberg02:** is away at 2:25:03 PM.

## Saturday, May 22, 2004

3:32:44 PM EDT

Mark Zuckerberg comes back to the Kirkland House home page on houseSYSTEM via bookmark or directly.

roam175-137.student.harvard.edu - - [22/May/2004:15:32:44 -0400] "GET / HTTP/1.1" 200 16315 "-" "Mozilla/5.0 (Windows; U; Windows NT 5.1; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

3:32:55 PM EDT

Mark Zuckerberg signs into houseSYSTEM.

roam175-137.student.harvard.edu - - [22/May/2004:15:32:55 -0400] "POST /index.html HTTP/1.1" 200 20462 "http://www.kirkland.harvardsec.org/" "Mozilla/5.0 (Windows; U; Windows NT 5.1; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

3:32:58 AM EDT

Mark Zuckerberg visits the houseSYSTEM FaceNet page.

roam175-137.student.harvard.edu - - [22/May/2004:15:32:58 -0400] "GET /facenet/index.html HTTP/1.1" 200 17044 "http://www.kirkland.harvardsec.org/index.html" "Mozilla/5.0 (Windows; U; Windows NT 5.1; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

3:33:02 PM EDT

Mark Zuckerberg visits Aaron Greenspan's profile on the houseSYSTEM FaceNet.

roam175-137.student.harvard.edu - - [22/May/2004:15:33:02 -0400] "GET /facenet/profile.html?id=1 HTTP/1.1" 200 20330 "http://www.kirkland.harvardsec.org/facenet/index.html" "Mozilla/5.0 (Windows; U; Windows NT 5.1; en-US; rv:1.5) Gecko/20031007 Firebird/0.7"

## Monday, May 24, 2004

**1:14:26 AM EDT (Recovered September 12, 2012)**

Mark Zuckerberg previously starts a conversation with Aaron Greenspan on AIM but Aaron is not responsive. Aaron replies back.

**ThinkComp:** you there?

**ThinkComp:** allo...

**zberg02:** hey what's up

**ThinkComp:** hi, you IMed earlier?

**zberg02:** oh i was going to ask something but i forgot what

**zberg02:** oh i remember

**zberg02:** how do you get on newstalk?

**ThinkComp:** no idea

**ThinkComp:** i'm not on it

**ThinkComp:** you have to be a crimson staffmember

**zberg02:** oh okay

**zberg02:** so you have to fake comp

**zberg02:** haha

**ThinkComp:** i guess

**ThinkComp:** you think they're talking about you?

**ThinkComp:** :-)

**zberg02:** apparently the winklevoss twins are spreading that i took the idea for thefacebook from them

**zberg02:** as if there was an idea haha

**zberg02:** well apparently there was supposed to be an article on it today

**zberg02:** and there is none

**zberg02:** so i can't tell if that's good or bad

**ThinkComp:** winklevoss?

**ThinkComp:** who the hell is that

**zberg02:** the people who made connectu

**ThinkComp:** i see

**ThinkComp:** they took a fair bit from housesystem too it seems.

**ThinkComp:** whatever.

**zberg02:** yea but they blame me for stealing stuff because i helped them for like a month

**zberg02:** but then i got bored and quit

**ThinkComp:** when was this

**zberg02:** in november

**ThinkComp:** aha

**ThinkComp:** that would make sense then

**ThinkComp:** they wrote about you on their about page

**ThinkComp:** without mentioning you

**zberg02:** yea but their site used to be purely a dating site

**zberg02:** and then they included so much from other social networking sites

**zberg02:** and claimed i stole that from them

**zberg02:** like the notion of friends

**zberg02:** choosing courses that you're taking

**zberg02:** being at multiple schools

**zberg02:** they even took poke haha

**ThinkComp:** yeah, i saw that.

**ThinkComp:** the joys of intellectual property.

**zberg02:** well it isn't really anyone's

**zberg02:** i don't care that they took it

**zberg02:** but they shouldn't say i took it from them haha

**ThinkComp:** oh, it's someone's.

**ThinkComp:** but trying to figure out whose at this point is pretty much a lost cause  
**ThinkComp:** one thing about social networking sites  
**ThinkComp:** is that they spread virally  
**ThinkComp:** not just their members  
**ThinkComp:** the sites themselves.  
**zberg02:** haha yea  
**zberg02:** well it was sixdegrees'  
**ThinkComp:** i remember them back in 1997  
**ThinkComp:** but i'm sure someone thought of it before them even  
**zberg02:** yea true  
**zberg02:** oh well  
**zberg02:** there are no school newspapers and ad boards after you graduate :-)  
**zberg02:** only the new york times and federal courts haha  
**zberg02:** but i feel like those are at least more fair  
**zberg02:** or maybe it's like the godfather, where the further up you go, the more corrupt it is

## Wednesday, June 2, 2004

**8:03:21 PM EDT (Recovered September 12, 2012)**

Mark Zuckerberg starts a conversation with Aaron Greenspan on AIM. (The file cited in the conversation is now located at <http://www.thinkcomputer.com/corporate/whitepapers/enronforkids.pdf>.)

**zberg02:** hey man  
**ThinkComp:** hi  
**zberg02:** i was just wondering where you're working after college  
**ThinkComp:** i'm working for myself  
**zberg02:** sorry that it's kind of out of the blue  
**zberg02:** awesome  
**zberg02:** you pulled it off  
**zberg02:** sweet  
**ThinkComp:** well, not really  
**ThinkComp:** i hope i will pull it off :-)  
**ThinkComp:** right now i'm too dead tired to do much of anything  
**ThinkComp:** heh  
**zberg02:** eh no hope  
**zberg02:** you'll do fine  
**zberg02:** there are only like six people in the world who have decent ideas  
**ThinkComp:** haha  
**zberg02:** and it's the job of the rest of the people to accuse us of taking their ideas haha  
**zberg02:** while we just continually kick ass  
**ThinkComp:** :-)  
**zberg02:** ho dude  
**zberg02:** you know doug sherrets?  
**zberg02:** haha  
**ThinkComp:** he emailed me out of the blue.  
**ThinkComp:** then he wanted to be my friend  
**ThinkComp:** you know how it goes.  
**zberg02:** haha yea  
**zberg02:** he like made an exact replica of thefacebook  
**zberg02:** it's so ghetto  
**ThinkComp:** really  
**ThinkComp:** that's interesting.  
**ThinkComp:** heh

**zberg02:** he called it facebook  
**ThinkComp:** yet another "young entrepreneur." [sigh]  
**zberg02:** haha seriously  
**zberg02:** there's only six  
**zberg02:** i'm telling you  
**zberg02:** i still need to meet the other three though  
**ThinkComp:** do you have names in mind  
**zberg02:** well i'd like to think i'm okay  
**zberg02:** you're good  
**zberg02:** there's this kid out in caltech who's sick  
**zberg02:** and that's like it for people in college right now  
**ThinkComp:** what's the caltech kid's name  
**zberg02:** adam dangelo  
**zberg02:** he taught me most of what i know haha  
**zberg02:** for every good thing i make he has like six  
**ThinkComp:** cool  
**zberg02:** i know a lot of kids who should be good though  
**zberg02:** and they just don't cut it  
**zberg02:** maybe it's a maturity thing  
**ThinkComp:** <http://www.thinkcomputer.com/corporate/news/enronforkids.pdf>  
**zberg02:** like none of the 50 or so people i met while down at huntsman seemed interesting  
**ThinkComp:** what's huntsman  
**zberg02:** it's this prestigious upenn international business program  
**ThinkComp:** cool  
**zberg02:** who wrote that article?  
**ThinkComp:** i did  
**ThinkComp:** it's not directly related  
**ThinkComp:** but it's the same phenomenon.  
**zberg02:** oh for what?  
**ThinkComp:** for venting purposes.  
**zberg02:** haha i hear that  
**zberg02:** i usually keep those secret  
**ThinkComp:** and i dont think having white papers on relevant topics is bad.  
**zberg02:** and then my computer crashes and i lose them  
**zberg02:** yea no it's definitely  
**zberg02:** good  
**zberg02:** for shpw  
**zberg02:** you use mozilla?  
**ThinkComp:** yep.  
**ThinkComp:** shpw?  
**zberg02:** show  
**ThinkComp:** oh sorry :-)  
**zberg02:** i can tell because thinkcomputer.com gives a javascript syntax error under ie haha  
**ThinkComp:** yeah, that's on my todo list of things to clean up.  
**ThinkComp:** i know where it is.  
**ThinkComp:** just haven't had two seconds to look at it.  
**ThinkComp:** ok must eat  
**ThinkComp:** ttyl  
**zberg02 is away at 8:27:47 PM.**

**Wednesday, August 11, 2004**

Aaron Greenspan begins writing a book about the origins of the Facebook phenomenon at Harvard University later titled *Authoritas: One Student's Harvard Admissions and the Founding of the Facebook Era* (<http://www.aarongreenspan.com/authoritas.html>).

## Friday, October 8, 2004

4:59:06 PM EDT

Mark Zuckerberg starts a conversation with Aaron Greenspan on AIM. (This conversation was not fully recorded due to Aaron Greenspan's computer crashing in the middle.)

**zberg02:** what do you mean by non-sto

**zberg02:** sto

**zberg02:** stop

**zberg02:** weir

**zberg02:** d

**ThinkComp:** yes...

**zberg02:** crap i've got to go

**zberg02:** i can look into that if you want

**zberg02:** thanks for testing wirehog out

**ThinkComp:** no problem

**ThinkComp:** later

zberg02 signed off at 5:46:24 PM.

zberg02 signed on at 5:46:25 PM.

## Monday, December 13, 2004

7:44:34 PM EST

Aaron Greenspan starts a conversation with Mark Zuckerberg on AIM.

**ThinkComp:** hey mark

**zberg02:** what's going on

**ThinkComp:** not too much

**ThinkComp:** is your email address still the FAS one?

**ThinkComp:** i wasn't sure

**ThinkComp:** i wanted to send you a congratulations on the current article

**ThinkComp:** i dont know if you got it

**ThinkComp:** mozilla has been acting weird

**zberg02:** yea it is i got that

**ThinkComp:** cool

**zberg02:** i just got back from la like 20 minutes ago

**ThinkComp:** oh sorry

**zberg02:** i got it while i was there

**zberg02:** thanks for sending it

**ThinkComp:** i should let you get settled

**zberg02:** na i'm just explaining why i didn't respond or anything

**ThinkComp:** ok no problem

**ThinkComp:** how was LA

**zberg02:** la was awesome

**zberg02:** sorry it took me a while there haha

**zberg02:** i'm trying to redesign the home page for facebook

**zberg02:** it's way too long when you have a message, a poke, a friend request and all that stuff

**zberg02:** but anyhow

**zberg02:** i went to the kroq concert both nights

**zberg02:** it was like the best thing ever  
**zberg02:** got to hang out back stage and meet green day  
**ThinkComp:** wow  
**ThinkComp:** that's pretty awesome  
**ThinkComp:** sorry, i was dealing with my grandmother who just destroyed a cassette tape  
**ThinkComp:** brb, i need to prevent her from killing two  
**zberg02:** haha okay  
**ThinkComp:** there  
**ThinkComp:** she has trouble seeing and so we thought books on tape might be good  
**ThinkComp:** heh  
**ThinkComp:** we thought wrong  
**ThinkComp:** anyway  
**ThinkComp:** so yeah  
**ThinkComp:** i read that article...it got me thinking that we may be able to help each other out  
**ThinkComp:** if you've got some downtime one day i'd like to give you a call and maybe throw around some ideas  
**zberg02:** okay sure  
**zberg02:** my phone's broken right now  
**zberg02:** which is like the worst thing ever  
**ThinkComp:** haha  
**zberg02:** because i'm totally out of contact with everything  
**ThinkComp:** yeah, doesn't sound too good.  
**ThinkComp:** hehe  
**zberg02:** what kinds of stuff are you working on now?  
**ThinkComp:** a lot of little projects  
**ThinkComp:** they're sort of boring me though  
**ThinkComp:** i don't have enough cash to implement any of the big things i'd like to do  
**ThinkComp:** yet, anyway :-)  
**zberg02:** just because something doesn't require a lot of cash doesn't mean it's little  
**ThinkComp:** true  
**ThinkComp:** but some of the stuff i'm working on really is  
**ThinkComp:** e-commerce site for one client  
**ThinkComp:** things like that  
**ThinkComp:** i have bigger things too, but i'm still not totally satisfied :-)  
**zberg02:** big things take so much time  
**zberg02:** haha  
**ThinkComp:** that i don't mind  
**zberg02:** yea i'm impatient  
**ThinkComp:** that's why i think we should talk :-)  
**zberg02:** that and i don't have time for bigger things  
**zberg02:** facebook and wirehog take up so much time  
**zberg02:** yea well i have some time now  
**zberg02:** i just don't have a phone haha  
**ThinkComp:** do you have a landline or a friend's phone maybe  
**zberg02:** neither  
**ThinkComp:** random stolen payphone perhaps...  
**zberg02:** friend's are out right now  
**ThinkComp:** do you have skype  
**ThinkComp:** i hating talking about business on IM  
**ThinkComp:** sorry  
**ThinkComp:** things get misconstrued way too easily  
**zberg02:** yea i understand  
**ThinkComp:** i also say things like "i hating talking"

**zberg02:** let's just hold off until one of my roommates gets back  
**ThinkComp:** ok  
**ThinkComp:** i'll be up for a while, so just let me know  
**zberg02:** might not happen tonight since i don't know where people are  
**zberg02:** and we're west coast so when i do find them we'll probably get dinner and such  
**zberg02:** but soon  
**ThinkComp:** right  
**ThinkComp:** ok

## Friday, December 17, 2004

11:55:38 PM EST

Aaron Greenspan calls Mark Zuckerberg and Sean Parker, taking notes.

Sean Parker from Plaxo is helping out.  
Peter Teal who started PayPal before it was sold to eBay has made an investment.  
Staff of 15-20 including lawyers and accountants.  
Wirehog is currently separate.  
Values thefacebook.com at \$100 million in one year according to standard 10X tech multiplier  
Believes Google could be Microsoft if it had five other companies doing various things.  
Delaware C corporation  
Wirehog is a separate corporation due to "liability issues"--interesting considering that he didn't think there were any before. His lawyers must have gotten through to him.  
VP Engineering needs to have 10-15 years of experience according to Mark on the phone, but only 7-8 according to the web site.  
Offered to help if possible by using houseSYSTEM Student Exchange interface against ConnectU.  
Spoke with Sean about copyright issue; he and Mark said it would be referred to their legal team.

## Thursday, January 13, 2005

1:25:57 AM EST

Aaron Greenspan starts a conversation with Mark Zuckerberg on AIM.

**ThinkComp:** thecampusbook.com?  
**ThinkComp:** do you know these people?  
**zberg02:** haha no  
**zberg02:** let me check it out  
**ThinkComp:** grrrr  
**zberg02:** who is it?  
**ThinkComp:** no idea  
**ThinkComp:** this web design company "avix"  
**ThinkComp:** <http://www.avixsolutions.com/portfolio/thecampusbook.asp>  
**zberg02:** where did you hear about it  
**ThinkComp:** on your site  
**ThinkComp:** they're an advertiser i suppose  
**zberg02:** haha  
**zberg02:** it's not at all similar to what we're doing  
**zberg02:** so i don't really care  
**ThinkComp:** no, clearly not  
**ThinkComp:** it's definitely the same as all the work i did though  
**ThinkComp:** i guess i'm surprised it's taken this long for someone to try and fill the gap.  
**zberg02:** oh good point

**ThinkComp:** the UC totally dropped the ball  
**ThinkComp:** and the crimson never even picked up on it  
**zberg02:** yea  
**zberg02:** oh well  
**zberg02:** i think social networks are distribution mechanisms  
**zberg02:** and that the features in that product and yours won't necessarily work without a large user base  
**zberg02:** which won't really come without a social net  
**zberg02:** my theory  
**ThinkComp:** you're right, you need a ton of people  
**ThinkComp:** the other way to get a ton of people is institutional backing  
**ThinkComp:** but obviously that didn't work out so hot  
**ThinkComp:** :-)  
**ThinkComp:** thanks to the fact that university hall is full of a bunch of pricks  
**zberg02:** well social nets do two things  
**zberg02:** get people signed up  
**zberg02:** get people psyched  
**zberg02:** with institutional backing you only get the first  
**ThinkComp:** true  
**ThinkComp:** that's a good point  
**ThinkComp:** if you think that networks are a good delivery mechanism though, which i agree with you on  
**ThinkComp:** what are you trying to deliver with thefacebook  
**ThinkComp:** wirehog?  
**zberg02:** trends  
**zberg02:** i kind of want to be the new mtv  
**zberg02:** not there yet though  
**ThinkComp:** that's interesting  
**ThinkComp:** mtv was the first company that came to mind when i thought of who you'd be a good site for  
**ThinkComp:** way back when  
**zberg02:** yea but i don't think they buy stuff  
**zberg02:** not that i want to sell yet  
**ThinkComp:** i'm pretty sure viacom does...  
**ThinkComp:** they're basically just a holding company for smaller companies  
**zberg02:** oh  
**ThinkComp:** of course the smaller companies are all ginormous, but still  
**ThinkComp:** you might actually be able to make a good pitch to them as the starting framework for really interactive tv  
**ThinkComp:** which everyone has been trying to get off the ground for 10 years with no success  
**ThinkComp:** but no one has tried interactive tv with a social network before either  
**ThinkComp:** alright bedtime  
**ThinkComp:** later

## Thursday, February 24, 2005

Facebook, Inc. fraudulently files for federal trademark protection on the mark FACEBOOK, USPTO Application Serial No. 78/574,730.

Facebook, Inc. fraudulently files for federal trademark protection on the mark THEFACEBOOK, USPTO Application Serial No. 78/574,726.

**Thursday, April 7, 2005**

4:12:44 PM EDT

Mark Zuckerberg starts a conversation with Aaron Greenspan on AIM.

**zberg02:** hey man

**ThinkComp:** hey, sorry, on the phone

**ThinkComp:** brb

**zberg02:** hey sorry got disconnected

**ThinkComp:**

**ThinkComp:** hey, sorry, on the phone

**ThinkComp:** brb

**zberg02:** okay cool

**zberg02 is away at 4:32:27 PM.**

**zberg02:** hey i'm putting up an away message but im me when you get back

**zberg02:** i'm at my computer

**ThinkComp:** ok

**ThinkComp:** sorry!

**ThinkComp:** (conf call)

**zberg02:** oh...are you going to be on the phone for a while?

**ThinkComp:** maybe 10-15 minutes

**ThinkComp:** hey sorry about that

**ThinkComp:** i assume you got a call fro the crimson

**zberg02:** yea

**ThinkComp:** because i did

**ThinkComp:** heh

**zberg02:** yea it's because of the yale article

**ThinkComp:** i still don't think the problem is really addressed at its root

**ThinkComp:** because the files are still there on the server

**zberg02:** yea the right solution is to have the php file sent a header saying it's a csv file

**ThinkComp:** right

**zberg02:** yea i didn't write that file

**zberg02:** my roommate did

**zberg02:** and he was in italy for a couple of weeks

**ThinkComp:** well that doesn't matter so much who wrote it

**zberg02:** yea i know i'm just saying he's fixing it

**ThinkComp:** alright

**ThinkComp:** i'm glad :-)

**ThinkComp:** i mean in the grand scheme of things it's not a huge problem

**ThinkComp:** i dont think anyone malicious has exploited it

**zberg02:** i was just wondering why you chose to publicize it though

**zberg02:** because publicizing it definitely blows it out of proportion

**zberg02:** it's a minor flaw, but pretty hard to exploit

**ThinkComp:** i'm not sure i agree...

**zberg02:** and even if it could be exploited, that information is available on the site anyway...

**ThinkComp:** not to non-members

**ThinkComp:** you've gone to pretty great lengths to prevent people from accessing data at other schools

**ThinkComp:** even when they are members

**ThinkComp:** also your privacy policy says that things are secure more or less

**zberg02:** yea well we try to make them secure

**ThinkComp:** of course

**ThinkComp:** basically i don't think it's really appropriate not to tell people when there's a problem

**zberg02:** i think in general we do a good job  
**ThinkComp:** i agree, it's much better now than it used to be  
**ThinkComp:** but hiding security flaws is generally not a good thing  
**zberg02:** i wasn't hiding it  
**zberg02:** but i think releasing a press release is a bit much  
**ThinkComp:** you were not publicizing it  
**ThinkComp:** it's the generally accepted way to announce things  
**zberg02:** especially because your press release was biased and made it seem like anyone could get anything  
**zberg02:** which isn't even true  
**ThinkComp:** well anyone could  
**ThinkComp:** what part was not true  
**zberg02:** only if the file was there  
**zberg02:** which it isn't unless someone had exported their contact info recently  
**ThinkComp:** i exported my data months before i found the flaw  
**ThinkComp:** and it was still there  
**zberg02:** weird  
**ThinkComp:** at first anyone who had ever exported had their data in the vcards directory  
**ThinkComp:** there was a lot of data there  
**zberg02:** i guess purging was added recently  
**zberg02:** yea  
**ThinkComp:** yeah only last week  
**ThinkComp:** or two weeks ago now  
**zberg02:** yea, so anyhow we fixed it  
**zberg02:** it's relatively secure now because the file is randomized  
**ThinkComp:** relatively i guess it's better  
**zberg02:** and i'll have dustin make it so the file doesn't stick around and then it will be better  
**ThinkComp:** only because of the random filename  
**ThinkComp:** the image matching field does no good at all  
**ThinkComp:** i'm not sure why it's there  
**zberg02:** that's to solve a different problem  
**ThinkComp:** ok  
**zberg02:** but anyhow  
**zberg02:** i kind of view you as a friend  
**ThinkComp:** likewise  
**zberg02:** we don't talk frequently but we ask each other questions about stuff  
**ThinkComp:** right, and i'd like to keep it that way  
**ThinkComp:** but when i tell you that something is wrong  
**ThinkComp:** and you know that it affects several hundred thousand people  
**zberg02:** and i understand about wanting to keep stuff secure  
**ThinkComp:** and then nothing happens for a week  
**ThinkComp:** or more in this case  
**ThinkComp:** i'm gonna tell someone  
**zberg02:** it wasn't more  
**zberg02:** it was 3-4 days i think  
**zberg02:** until dustin got back  
**zberg02:** and then he added purge  
**ThinkComp:** regardless  
**ThinkComp:** ok well if you ever find a problem in my code, which you very well might  
**zberg02:** and then he added randomness  
**ThinkComp:** i will fix it instantly  
**ThinkComp:** not 3-4 days later  
**zberg02:** i appreciate that

**ThinkComp:** i don't care who wrote it  
**ThinkComp:** or where they are  
**ThinkComp:** it's your responsibility to get it done  
**zberg02:** yea but it's also my responsibility to get other stuff done as well  
**zberg02:** you know how it is to run a business  
**ThinkComp:** believe me, i totally understand that :-)  
**ThinkComp:** i'm drowning in taxes  
**ThinkComp:** and have 20 other projects going on  
**zberg02:** yea  
**ThinkComp:** but those projects affect maybe 30 people collectively  
**ThinkComp:** and there's no danger element  
**zberg02:** and i really do get that you care about people's security  
**ThinkComp:** you could have opened yourself up to another lawsuit had you left it open longer  
**zberg02:** not quite  
**ThinkComp:** oh yes  
**ThinkComp:** very much so  
**ThinkComp:** FTC code section 5  
**zberg02:** okay, i feel like there is a standard bug disclosure process  
**zberg02:** which includes notifying the person of the bug  
**zberg02:** which you did  
**zberg02:** notifying them that you will disclose it  
**zberg02:** which you didn't  
**zberg02:** giving them some time to fix it  
**zberg02:** which arguably a week isn't that long  
**zberg02:** but even if it was  
**ThinkComp:** ok you know this is a small bug mark, you said it yourself  
**ThinkComp:** i've written the octet-stream code in about 2hours  
**ThinkComp:** one week is more than enough time  
**zberg02:** after that time, if those things are followed, people send something to bugtraw or something  
**ThinkComp:** or write white papers  
**ThinkComp:** or for very small bugs not even  
**zberg02:** but those things are for savvy audiences  
**zberg02:** i don't care if people who understand this stuff know about the bug  
**zberg02:** because they are capable of understanding when it's patched and when it's secure and the extent to the insecurity  
**zberg02:** talking to newspapers that target our audience causes some hysteria, which just isn't necessary  
**zberg02:** especially given the magnitude of the problem  
**zberg02:** a whole article is being written about in the crimson now  
**zberg02:** do you think that's right?  
**ThinkComp:** absolutely  
**ThinkComp:** it will make people aware of this kind of thing  
**ThinkComp:** and people really need to be aware  
**zberg02:** to some extent  
**zberg02:** but it will also cause some hysteria  
**ThinkComp:** well that's your hypothesis  
**ThinkComp:** i doubt there will be any hysteria  
**zberg02:** well it will probably cause more fear than there needs to be  
**zberg02:** given that it's patched now  
**ThinkComp:** well i would argue that people being afraid of disclosing their home address and birthday on a site accessible by millions of people isn't that bad of a thing  
**zberg02:** okay, well that's an opinion

**ThinkComp:** yes, it is  
**zberg02:** okay, well the reason why i really wanted to mention this to you is because i remember we spoke on the phone a few months back  
**ThinkComp:** i guess you haven't had anything horrible happen to make you feel that way, and for that i'm glad  
**ThinkComp:** but after the payroll mess i'm in  
**ThinkComp:** i believe that pretty strongly  
**zberg02:** and you talked about you tend to antagonize people by doing certain things  
**zberg02:** i just felt that you should know that i felt antagonized by this  
**ThinkComp:** well i apologize, but you were forewarned  
**zberg02:** i understand that you feel a certain way and want to protect a privacy idea that you hold, but i guess i'd just expect a friend to act differently  
**ThinkComp:** right, and i expected you to take me seriously enough to fix it.  
**zberg02:** and i did  
**ThinkComp:** did you actually fix it that night, like you said you would in your email?  
**ThinkComp:** no  
**ThinkComp:** anyway  
**ThinkComp:** it's fixed now  
**zberg02:** well i asked dustin to  
**ThinkComp:** right, well, we've been over that  
**ThinkComp:** i think the end result of all this  
**zberg02:** i can send you the email i sent to him and the response i got back saying he'd fix it  
**zberg02:** but that doesn't matter  
**ThinkComp:** no, i believe you  
**ThinkComp:** short-term, people will say, ooo, there was a problem  
**ThinkComp:** long-term, your users are safer  
**ThinkComp:** your site is more secure  
**ThinkComp:** you will get more good press  
**ThinkComp:** of that i am certain  
**zberg02:** the site would have been made secure anyway  
**zberg02:** we do stuff without privacy concerns being raised  
**ThinkComp:** as you should  
**zberg02:** like the reverse turing test on the contact stuff  
**ThinkComp:** and so do i  
**zberg02:** and making emails in profiles images  
**zberg02:** and this should have been fixed too  
**zberg02:** and it got fixed  
**zberg02:** i just don't think any harm was done  
**zberg02:** so i feel a little antagonized  
**zberg02:** that's really it  
**zberg02:** i agree that things should be secure  
**ThinkComp:** ok, well, i guess i can't help that then.  
**zberg02:** and i take responsibility for the problem  
**zberg02:** i'm not trying to push responsibility onto my roommate  
**zberg02:** i'm just explaining why it didn't get done in the time frame we both wanted  
**ThinkComp:** ok  
**zberg02:** well, given that you can't change anything now, i just wanted to let you know  
**ThinkComp:** ok  
**zberg02:** because of what you told me before  
**ThinkComp:** i appreciate it  
**zberg02:** i figured you'd probably want to know how i felt  
**zberg02:** and there's a chance that this will be picked up on by other papers  
**zberg02:** or by connectu or someone trying to hurt our name

**ThinkComp:** maybe  
**ThinkComp:** i doubt it  
**zberg02:** connectu is pretty tenacious  
**zberg02:** if they read something bad about facebook i bet they'd pick up on it  
**ThinkComp:** yeah but it doesn't relate to copyright infringement even a little bit  
**zberg02:** yea but they're just generally competitive  
**zberg02:** or try to be  
**ThinkComp:** speaking of which  
**ThinkComp:** you're not exactly the kind of person who hasn't antagonized anyone yourself  
**ThinkComp:** another thing i pointed out to you on the phone  
**ThinkComp:** is that i have cause to sue both of you  
**ThinkComp:** but i got over it.  
**ThinkComp:** so i hope you can get over this  
**zberg02:** i can  
**ThinkComp:** if other papers call i'll tell them what i told the crimson  
**ThinkComp:** which is that it's not a huge deal  
**ThinkComp:** but it should have been fixed sooner  
**ThinkComp:** that's all.  
**zberg02:** okay fair enough  
**zberg02:** if you're telling the crimson that it's not a big deal then i believe you  
**ThinkComp:** well keep in mind that they have an amazing tendency to totally misquote people  
**ThinkComp:** as i'm sure you know  
**zberg02:** and that's what i think is probably fair (although i'm obviously biased here)  
**ThinkComp:** so what i told the guy on the phone may not be what's printed tomorrow  
**ThinkComp:** but i don't exaggerate things  
**ThinkComp:** and i re-read my press release  
**ThinkComp:** and it's all true  
**zberg02:** not everyone's information is available  
**ThinkComp:** i don't think i said that  
**zberg02:** less than 2% of users have ever exported their contact info  
**ThinkComp:** right, but matt mahan had 750 friends  
**ThinkComp:** there are 6,400 students at harvard  
**ThinkComp:** that's already more than 10% of the undergraduate body with 1 person's ID  
**zberg02:** at a small school like harvard, yea  
**zberg02:** anyhow, not worth arguing about  
**ThinkComp:** i agree  
**ThinkComp:** what's important is that it is or gets fixed.  
**zberg02:** if you feel like there's a chance that the crimson is going to blow this out of proportion, then maybe you could call them back to make sure they understand what you mean to get across  
**zberg02:** i mean misrepresent you, not blow this out of proportion  
**ThinkComp:** i don't remember the reporter's name, but i asked him to email me my quotes so i could verify their accuracy  
**ThinkComp:** when he emails me, i will reply to him and bcc you  
**zberg02:** okay  
**zberg02:** thanks  
**ThinkComp:** meanwhile, i really do have to get back to work.  
**zberg02:** i should probably get back to my taxes now haha  
**ThinkComp:** yes  
**zberg02:** yea...  
**ThinkComp:** i'll talk to you later i hope  
**zberg02:** yup, see you

5:52:29 PM EDT

Mark Zuckerberg starts a conversation with Aaron Greenspan on AIM.

**zberg02:** hey how do you feel about blogging?

**ThinkComp:** the same way i feel about XML

**zberg02:** haha what's that

**ThinkComp:** they exist

**zberg02:** bad?

**ThinkComp:** they're overhyped

**zberg02:** i was reading over your other security announcements on your website

**zberg02:** good procrastination reading

**ThinkComp:** :-)

**zberg02:** do you think you could find a lot more stuff like that?

**ThinkComp:** i'm sure

**ThinkComp:** if you mean security problems

**zberg02:** i bet if you blogged about it you'd get tons of traffic

**zberg02:** yea

**ThinkComp:** i don't really want to though unless they involved me

**zberg02:** like gave short explanations of stuff

**ThinkComp:** er, involve

**zberg02:** i think people find it interesting though

**ThinkComp:** yeah i don't have a blog

**ThinkComp:** i have a personal site

**zberg02:** i don't have one either

**ThinkComp:** you'd get plenty of traffic too i'm sure

**ThinkComp:** but i don't really want people reading what goes on in my daily life

**ThinkComp:** i'm writing a book to vent my frustration instead.

**ThinkComp:** :-)

**zberg02:** yea but it's more of a professional blog

**zberg02:** not a personal one

**ThinkComp:** oh

**zberg02:** personal ones are dumb

**ThinkComp:** that i'd never do

**zberg02:** well not as a job

**ThinkComp:** i know what you mean

**zberg02:** just as something that would be interesting

**zberg02:** but relatively emotionless

**ThinkComp:** but i think blogs are inherently unprofessional

**ThinkComp:** so i wouldn't want the company to have one

**zberg02:** what about slashdot?

**zberg02:** what do you think of it i mean

**ThinkComp:** i read it daily

**ThinkComp:** if slashdot picks up my papers, which it has a few times now

**ThinkComp:** that's fine with me

**zberg02:** it's basically a blog

**ThinkComp:** no it's not

**ThinkComp:** it has editors

**ThinkComp:** and they're extremely picky

**ThinkComp:** if it was a blog there would be so much worthless junk on it that no one would read it

**ThinkComp:** the comments are more like a blog i guess

**ThinkComp:** but even those are rated and queried based on rank

**zberg02:** i think the posts are more interesting

**zberg02:** anyhow, i just thought that would be interesting

**zberg02:** i bet people would read it a lot  
**ThinkComp:** yeah i dunno  
**zberg02:** the stuff has consumer appeal  
**ThinkComp:** i'm hoping to finish the book draft by the end of this summer  
**zberg02:** what are you writing about?  
**ThinkComp:** maybe i'll change my mind about blogs once that's off my shoulders  
**zberg02:** haha  
**ThinkComp:** it's basically just a truncated auto-biography that stops when i graduate  
**ThinkComp:** but it's going to really focus on harvard  
**ThinkComp:** and why i left  
**ThinkComp:** i bet university hall will love it  
**ThinkComp:** and so will larry  
**zberg02:** larry has enough other things to love  
**ThinkComp:** yeah :-)  
**ThinkComp:** so why don't you have a blog  
**zberg02:** what could i blog about  
**zberg02:** my personal life isn't interesting  
**ThinkComp:** running thefacebook  
**zberg02:** i send a lot of time working  
**ThinkComp:** everyone knows your name now  
**ThinkComp:** or at least what you look like heh  
**zberg02:** and i can't discuss business plans because that's just bad practice haha  
**ThinkComp:** yeah i guess that's another reason i don't have one  
**ThinkComp:** i don't want people to know what i'm working on  
**ThinkComp:** until i want them to know  
**zberg02:** but security stuff is a series of unrelated things  
**zberg02:** so i figured it worked well with that model  
**ThinkComp:** i really don't want to do more security though  
**ThinkComp:** there's so much legal risk involved  
**ThinkComp:** if paymaxx had sued me i would have been done  
**ThinkComp:** they could crush me  
**ThinkComp:** i would have screamed bloody murder at the senate  
**ThinkComp:** but i'm doing that anyway  
**ThinkComp:** precisely because the laws are drafted to prevent people from talking about flaws  
**ThinkComp:** which is bad  
**zberg02:** yea that sucks  
**zberg02:** hey i'm getting greek letters put up in front of our office  
**zberg02:** tau phi beta  
**zberg02:** haha  
**zberg02:** brb  
**ThinkComp:** :-)  
**ThinkComp:** better check availability on thephacebook.com hehe  
**zberg02:** actually we just got facebook.com  
**zberg02:** or are getting it soon  
**ThinkComp:** cool  
**zberg02:** and then we'll have a better domain  
**zberg02:** haha  
**zberg02:** okay i'm going to eat  
**ThinkComp:** alright  
**zberg02:** bye bye  
**ThinkComp:** later  
**zberg02 returned at 6:37:57 PM.**  
**zberg02 is away at 6:38:30 PM.**

zberg02 returned at 6:38:37 PM.  
zberg02 is idle at 7:12:58 PM.

## Sunday, August 21, 2005

8:50:59 PM EDT

Mark Zuckerberg starts a conversation with Aaron Greenspan on AIM.

**ThinkComp:** thefacebook network?

**zberg02:** ?

**ThinkComp:** tfbnw.net

**ThinkComp:** you got me curious :-)

**zberg02:** haha i didn't even realize we owned that

**zberg02:** i guess the ops team is using that for something internal

**ThinkComp:** cool

**zberg02:** you freaked me out for a second

**ThinkComp:** heh sorry

**zberg02:** i thought you were talking about someone who was competing with us using our name  
haha

**ThinkComp:** no no

**ThinkComp:** sorry about that

**ThinkComp:** i was just wondering what it was

**ThinkComp:** how's life

**zberg02:** stuff is pretty good

**zberg02:** we're redesigning the site

**zberg02:** going to launch in the next few days

**zberg02:** kind of excited

**ThinkComp:** nice

**zberg02:** a little afraid

**ThinkComp:** heh

**ThinkComp:** you can't do worse than the post.harvard team

**ThinkComp:** i'm sure it will be fine

**zberg02:** yea but they're not the competition

**zberg02:** now i'm up against murdoch and myspace

**ThinkComp:** no, they'd just like to be

**ThinkComp:** yeah i heard about that

**ThinkComp:** sort of surprised at their valuation

**ThinkComp:** but i don't think they really overlap with the college niche that much

**ThinkComp:** so how much competition is there really in the US?

**ThinkComp:** i get the impression that myspace is mostly popular abroad

**zberg02:** they don't have a large college base yet

**zberg02:** but they are 80% american

**ThinkComp:** i still think you could have something amazing by integrating my email thing into  
your site

**ThinkComp:** that murdoch definitely wouldn't

**zberg02:** why your email?

**ThinkComp:** because there's absolutely no spam

**zberg02:** how do you prevent it

**ThinkComp:** it doesn't run on SMTP

**ThinkComp:** it's just a giant mysql table

**ThinkComp:** but with embedded rules to prevent illegitimate mass mailing

**ThinkComp:** which SMTP lacks

**ThinkComp:** and you already have the most difficult part, identity verification, complete

**ThinkComp:** because you've been restricting usage by domain  
**ThinkComp:** it would be the largest spam-free email network around  
**zberg02:** but people could only email others on the network?  
**ThinkComp:** you can email outside the network, but the person has to join before they can read it  
**ThinkComp:** otherwise the message basically just sits till the person signs up  
**ThinkComp:** because the whole system depends on identity verification  
**ThinkComp:** and the idea of enforcement--you spam, your account takes a hit  
**ThinkComp:** i think, though, the in/out-of-network issue can work both ways depending on the size of the network to start  
**ThinkComp:** when it's tiny, it's a disincentive to have to join  
**ThinkComp:** but when it's large, there's actually an incentive  
**ThinkComp:** your network is pretty large  
**ThinkComp:** obviously  
**zberg02:** yea  
**zberg02:** i have issues with being too protective in a competitive environment though  
**zberg02:** it also seems like the game becomes that you have to get as many people in as quickly as possible  
**zberg02:** and not put barriers in the way  
**ThinkComp:** why's that  
**ThinkComp:** i mean, as quickly as possible  
**ThinkComp:** and as far as barriers go, there would be no harm in allowing all outgoing SMTP mail, and automatically using a user's friend list as an incoming SMTP whitelist  
**zberg02:** hey sorry i didn't mean to stop responding  
**zberg02:** there are just a lot of people around and we're doing design stuff  
**ThinkComp:** np, sorry  
**zberg02:** don't apologize  
**zberg02:** i'm going to focus on that stuff though  
**zberg02:** we'll speak soon  
**ThinkComp:** ok  
**ThinkComp:** good luck on the design front  
**ThinkComp:** i'm happy to beta test  
**zberg02:** okay we're testing it tomorrow  
**zberg02:** if you're online i'll send you a link  
**ThinkComp:** cool

Hello,

Thank you for advertising with Google AdWords. I recently reviewed your AdWords account and found that your ads and/or keywords violate our guidelines, or you filed an exception request from our policies and it is awaiting a response. Below, please find my report on your account status.

If an ad has been suspended, visit the Disapproved Ads page in your account to view the reason for disapproval and to edit your ad. To access this page, use the following link: <http://adwords.google.com/select/disapprovedads> (You may need to log in before you can access this page.)

-----  
Campaign: 'Think Press,' Ad group: 'Authoritas'  
-----

AD TEXT:

The Story Behind Facebook  
Learn how Facebook got its start  
Save 10% on Authoritas  
[www.thinkpress.com](http://www.thinkpress.com)

Ad Status: Suspended - Pending Revision  
Ad Issue(s): Trademark in Ad Content  
~~~~~

DENIED EXCEPTION(S):

After careful consideration, we are unable to grant the exception requests listed below. Your ad or keyword is no longer active. For your convenience, I've included your original message to us directly below each policy violation.

Trademarked Term: Facebook

Your explanation: I own common law trademark rights on the term "Facebook" which predece Facebook, Inc.'s registered trademark rights. That's why I wrote the book that this advertisement is for.

Trademarked Term: Facebook

Your explanation: I own common law trademark rights on the term "Facebook" which predece Facebook, Inc.'s registered trademark rights. That's why I wrote the book that this advertisement is for.

SUGGESTIONS:

-> Ad Content: Please remove the following trademark from your ad: "Facebook", .

-----  
POLICY DEFINITIONS:

Trademark in Ad Content: Due to trademark complaints, we do not allow advertisers to use certain trademarked terms or elements in their Google AdWords campaigns. You can learn more about Google's trademark policy at [http://www.google.com/tm\\_complaint.html](http://www.google.com/tm_complaint.html).

-----  
If an ad has been suspended, you may edit it and save your changes to automatically resubmit the ad for review.

If a keyword has been suspended, it will no longer trigger your ad(s).

For more information about our ad requirements, please read the AdWords Editorial Guidelines at: <https://adwords.google.com/select/guidelines.html>

If you have any further questions or concerns, please feel free to contact us at: <https://adwords.google.com/support/bin/request.py>.

We look forward to providing you with the most effective advertising available.

Sincerely,

The Google AdWords Team

Email Alerts: To stop receiving email notifications whenever your ads are disapproved, modify your email preferences in the 'Account Preferences' section of the My Account tab.

Think Computer Corporation files its Petition to Cancel FACEBOOK as a registered trademark with the United States Patent and Trademark Office Trademark Trial and Appeal Board.

## **Sunday, June 1, 2008**

Think Press, a division of Think Computer Corporation, officially releases *Authoritas: One Student's Harvard Admissions and the Founding of the Facebook Era* in hardcover, ISBN 9781606690000.

## **Thursday, March 12, 2009**

Think Computer Corporation files its Petition to Cancel THEFACEBOOK as a registered trademark with the United States Patent and Trademark Office Trademark Trial and Appeal Board.

## **Friday, May 22, 2009**

### **11:54:50 AM PDT**

Aaron Greenspan signs the final long form of a settlement agreement with Facebook, Inc. and Mark Zuckerberg on behalf of himself and Think Computer Corporation.

### **Approximately 11:13 PM PDT**

Even though the wording has been pre-approved, Facebook, Inc. posts the press release concerning the settlement after 11:00 PM on the west coast (2:00 AM Saturday on the east coast) on the Friday before Memorial Day weekend to keep it out of the news cycle. The press release is now available here:
